NO MORE STREET FIGHTER II!

We received our finished copy of Super Street Fighter II just the other day and of course everybody in the office gathered around waiting for their turn to play. After a couple of hours, the crowd cleared and the game just sat there. Noticing that, I asked everybody what they thought about the new version. Noticing that, I asked everybody what it was just another version of SF2. The consensus was that it was OK, but it was just another version of SF2. Granted it is the best SF2 to date, but considering that it is the third time Capcom is redoing the game, they expected perfection.

The question I have is do we really need another revised and improved SF2? Judging by our staff's opinions in addition to the tons of letters we have already received from our readers, the answer seems to be no. Granted, if you are a street fighting fanatic, you will go out and buy the cart no matter what anybody says. But if you are an average player, you probably will be very disappointed after you play it for a while. At best I recommend that you rent it.

Try the new characters and then decide if you want to spend the \$70 to \$80.

We don't think it's worth that kind of money. The problem is until the players stop buying the countless let's-make-a-couple-changes-and-call-it-super sequels, the companies will just keep on cranking out version after version. For example, do you really think that Capcom of Japan isn't working on a Super Turbo version? It's just not Capcom that does a lot of sequels. One Super Turbo version? It's just not Capcom that does a lot of sequels. One can't forget EA's long list of Madden or NHL games. Or check any game list and look at the games with numbers in the titles. There are quite a few.

Gaming magazines are also guilty of perpetuating the sequel phenomenon. If you look at all of the reviews of Super SF2, you'll see a lot of smiling faces or near perfect numerical evaluations. I believe that these reviewers are missing the point of what a review is all about. Games aren't cheap and kids have ing the point of what a review is all about. Games aren't cheap and kids have to save up quite a while to get enough money for their next cart. I don't want to be the one who gives a 98 to a game which has a play time of less than one day before it is shelved because the player found out too late that the game is not much more than a cosmetic update of a game he already has. There has to be a better method of game evaluation.

So where do we stand? In our reviews we are going to start taking into account this type of excessive game program repetition in sequels. It's not an easy task as it is going to be subjective at first. Our goal is to take the 'average' player into consideration. The one who already has an SF2 Turbo or a Madden '94. This player only buys a few games in a year and is not a person who has to have every sequel that comes out. Is this being excessively harsh on the 'sequel companies?' We don't think so. Take Super SF2 for example. I on the 'sequel companies?' We don't think so. Take Super SF2 for example. LETTER OF THE MONTH!

WHICH SYSTEM IS BETTER?

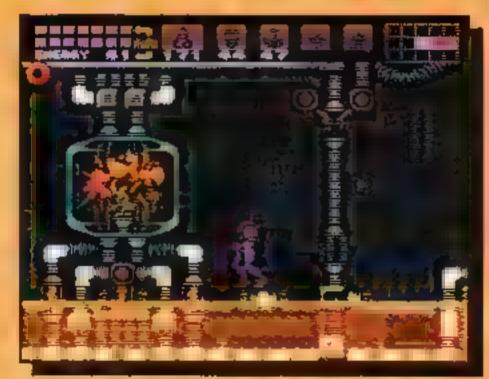

My friend Mike and I always have arguments over which is better, Genesis or Super NES. I say Genesis, because of its games. Some of which may suck, but usually the games kick butt. Mike always comes up with something like, "But Nintendo has some odd number of colors!" or "It just has better graphics," and "The Super NES version is better than the Sega version!"

I just [looked at] the March issue of EGM and read the articles about what Sega is coming out with and how they are beating Super NES

I want you people to try to settle this argument, find out from top people, k ds, parents, whatever ... which is better? Genesis or Super NES?

Kyle Koster Wheat Ridge, CO

(Ed. This is an age-old question. The fact is that there is no answer. If you enjoy the games on one system more than the other, then of course you're going to think it is better. All systems have their share of substandard games, it goes with the territory. The Super NES performs the best with fighting games, arcade translations, RPGs, and side-scrolling adventure games. The Genesis excels in the area of sports, action games, and shooters. If

Super Metroid is a Super NES-only title that features lots of adventure.

you're a fighting game maniac, then the Super NES is a good choice. If you like sports games, then the Genesis is your system. The Genesis loses out in arcade translations, however, because that type of game demands colors and sounds that the Genesis, unfortunately, doesn't have. Both companies stress their good points, and Sega releases a lot of sports and action games, because they know that the Genesis is best suited to handle these types of games. Not that the Super NES doesn't do a fine job. Nintendo releases games that take advantage of the Super NES' capabilities, like Mario Kart, Super Metroid, and Zelda. So, I guess the answer is, they're both goodit just depends on the games you like to play.)

WIN A PAIR OF ACCLAIM JOYSTICKS!

The best letter submitted each month will win his/her choice of either the Super NES or Genesis version of Acclaim's hot, new Dual Turbo Wireless Remote System.

NINTENDO QUESTIONS

What I want to know is, why all the games like World Heroes 2 and Samurai Shodown were never put on the Super NES or Game Gear? Why is everybody putting down Nintendo, I mean Sega's Mortal Kombat has hardly any sound, the graphics are blurry, and the only reason they're making money is because of the blood and fatalities? This isn't the only game that's messed up. Don't get me wrong or anything, in fact I think the Sega CD is an awesome system. Wil Mortal Kombat II ever come to the Super NES,

Samurai Shodown comes to the Super NES courtesy of Takara this fall.

and will it have all the original fatalities, blood, background, sound, and graphics? I know you guys at *EGM* will let us game players know about it. Is it true Nintendo is making a CD system of their own? I wonder if Nintendo and Sega will team up and make a giant system. It will be the talk of the century. Keep up the magazines, they're great

Kevin Garcia Jacksonville, FL

(Ed Samurai Shodown and World Heroes 2 are coming to the Super NES later this year from Takara. MKII for the Super NES has everything in it. Nintendo shelved plans for a CD. A team-up?! Not likely) THE SHADOW MASTER

HOW DO I PROMOTE MY 'ZINE?

I am a soon-to-be fanzine editor and have run into but one problem. I don't know how to advertise nationwide! I realize that there are several lists of fanzines (with their prices and addresses) similar to that of your January 1993 TurboForce article (vol 3), but as of now, I don't know how to get my fanzine on any of those lists.

So, if you could just suggest a few, I would be very thankful. Thanks again for your help (which, by the way, I could not do my mag without!) and your time.

Tom McQuail II Quakertown, PA

(Ed. There are lists available, but the best way to get your fanzine known is to send it to other fanzine editors. Write them a letter in advance, telling them you'd like to trade with them, and see if they'll promote your new 'zine in theirs. You may also want to send a copy for review in Fandom Central in EGM? You don't have to spend money advertising if word of mouth works just as well)

NINTENDO MANIFESTO

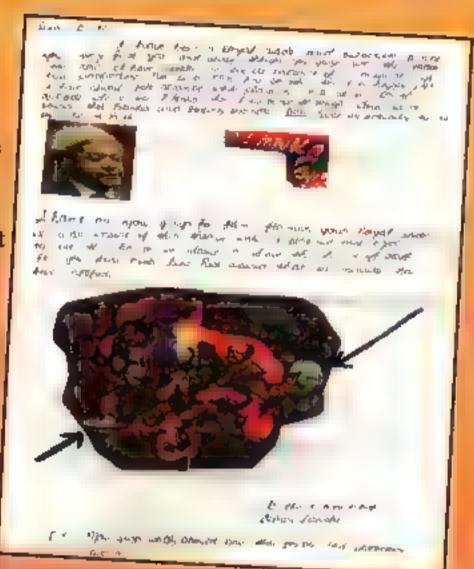

What is this? You are always putting Sega down. Why is this? I'm really ticked off. Every Genesis game usually gets poor ratings. I saw the ratings for World Series Baseball: 8, 7, 8, 7, 6. That really made me mad, it should have at least gotten straight 8s. But do you really want to know what makes me mad? The ad for the Super NES smashing. It asks which system has a European Porcupine (Sonic) for a mascot. What in the [Ed -rhymes] with 'fell.'] kind of question is that? That porcupine could rip Mario to shreds. And the ratings for Street Fighter II CE for Genesis are all wrong. My brother has the game and just because it doesn't have the color and sound the Super NES has, doesn't mean it's a bad game. That ticks me off. The control is excellent and the moves are easy to do. And unlike the Super NES, you don't have to do a trick to get 10 stars and it has a group battle. And every kid I know has a Genesis. And at least Genesis has a rating system and blood on their games instead of sweat, like on the Super NES. The sales are 63% (Sega), 37% (Super NES) Oh, in Issue 58, the new Game Boy is a stupid idea. Because if you own a different system. besides Super NES how is it going to

If you think you have what it takes to contribute to society, go write to Newsweek. If, however, you have a thought or opinion that fellow gamers would particularly find crazy, we dilove to immortalize you with a special edition *EGM* T-shirt proclaiming your fondness of and psychosis to video games!

Dear EGM.

I have been a loyal reader and subscriber since your very first year and always thought you guys were the greatest, until now! I have recently uncovered evidence of a conspiracy of epic proportions. Not since JFK has something this big happened! I have always felt strong while playing SFII at my local arcade when I saw Blanka. Then I discovered through ultra-secret sources that Blanka and boxing promoter DON KING are actually twins separated at birth! Shame on you guys for flim-flamming your loyal readers. I was unsure of this theory until I strained my eyes to see this horror in issue 51. Save this kind of stuff for your April Fool's issue. Rest assured that 60 Minutes has been notified.

Thanks go out to Ashley Speight of Rockingham, NC, for this startling SFII revelation. Ashley will be receiving an *EGM* T-shirt and the satisfaction of knowing that Blanka and Don King have been reunited. Family photo everyone!

work? I own a Genesis and a Game Boy and I will not spend more money to go and buy a Super NES and a new Game Boy. And which system has a CD? Genesis. I'm sorry, but Genesis is the better system. Oh, and do you know when SSFII Turbo is supposed to be out?

> lan Derksen Clovis, NM

(Ed. First off, a reviewer's opinion is another person's opinion of the game. Yours obviously differs, and that's fine The Genesis version of SFII CE got three 8s and a 9 in the November 1993 issue (#52) The blood argument will soon be irrelevant, because both systems have it in MKII. Your sales figures are a bit messed up. According to recently published sources, the market share is just about 50/50. In your area, maybe everyone you know owns a Genesis, but that may not be true in other parts of the country. Do any of your Genesis-owning friends also own a Super NES? The Super Game Boy, which you mention is a Nintendo-made peripheral only for the Super NES. It is interesting that you mention the Sega CD, yet you also say you don't own one. What's the difference then

if they have one or not? Going back to the Letter of the Month, you seem to like sports games, and you own a Genesis You don't need to give any other reason why you like the Genesis. Why trash the other system just because you don't own it? Maybe if you sat down and tried it, you d like some of the games. Sit down and play the other system's games before you bash! Sometimes you'll find that a few of the other system's games are ones that you feel are great. If there's a game you like, maybe look for a version of it coming to your system. If there isn't a possibility of it coming over, then there's no better time to invest in another 16-Bit system. than now. System prices have dropped dramatically over the past few months, and with store sales and promotions, you could easily pick up one of the 16-Bit systems for a cool \$80. That's not much more. than the price of a game, and you li be able to pick and choose a library of the best games for each of the systems. Then you can't lose. Some rental stores rent out systems, so try that. Or if you have a buddy that has the other' system, trade with him/her. They'll see the good games. for your system, and you'll see the hits for his/hers)

Brian Greenfelder Lexington, OH

The blood will be intact in all versions of Mortal Kombat II.

(Ed When Mortal Kombat II is released for the home systems in September, the blood will be present in all versions. That means then that Nintendo has changed their guidelines to go along with the new industry-wide rating system. I don't think complaints about the blood pressured them into changing—I believe it was sales of the first Mortal Kombat cartridge. If the blood had been in the Super NES version, you're right, it would have outsold the Genesis one. If the senators thought that the original Mortal Kombat was bad, wait until they catch a glimpse of this! There's no doubt more media coverage will be forthcoming on this hot sequel. Speaking of which, if you're an MK fan you might want to check out Mortal Kombat—The Album. It's different than the CD single, and it has techno tracks named after each of the Mortal Warriors. KIGHLY JAMMABLE

We think that NBA Jam is an excellent game. A few things could be changed or added to make a good game great. Below is a list of what we think the sequel to NBA Jam should be like

- 1) Title. NBA JAM !I—The U timate Jam
- 2) There should be different dunks for different players
- 3) More spectacular dunks when a player is "on fire" than when he is not
- 4) More challenging game play—better Al.
- 5.) Three players to choose from, but you can choose only two to play as in the game.
- 6) Play as all-time greats (retired players), with or without the use of a code
- 7) More enthusiastic announcers with better sayings.
- 8) Announcers say, "Nice shot" and "Way to go" after you make a difficult shot.
- Saveable stats—seasonal (use birthday and initials, along with a code to access stats)
- 10) Have a Playoff Option
- 11.) After you win the championship play against all-time great players and custom design your own players.

Start low with abilities and work your way to the top
Use point-type system to reach peak performance

- 12) Be able to break backboard at least once per quarter
- 13) Different types of backboardbreaking—shattering.

What will the sequel to NBA Jam be like? These guys have got some ideas.

14) Automatic instant replay on spectacular plays—option to turn it on or off
Thanks for your time and keep up the great work.

Mike Collier and Jacob Archer Marysville, OH

(Ed You guys have some great ideas here. Maybe Midway will add these features in to their next Jam arcade game, and, of course, the home versions! Maybe they would want to release a special update just for home play?)

SEQUEL STORM

WHAT SHOULD THEY IMPROVE?

We name a game that doesn't already have a sequel, and you send in ideas on what you'd most like to see. Don't make it too lengthy, just jot down ideas, and we'll draw a few from the pit.

This month, we turn to an old friend. The game that Tim just can't get enough of! It's Nintendo's Super Mario Kart, a fantastic game that we think rightfully deserves a sequel. Got any ideas, readers? Send them along to us and we'll collect a list of the best and print them! INTERACTIVE MAGAZINE, I love it!

LAST ACTION 'HAMMER BROS.'

I would like to let your readers know about my recent decision to part with ail of my Nintendo hardware and software. I'm an adult in my late 20s who has owned a Super NES since the system was originally released. I was satisfied with the games until Nintendo started up with their fascist censorship policy and began to butcher their games. Nintendo's attitude of not caring about what the customer wants to see, and still expecting us to run out and buy their "toned-down" rubbish, irritates me immensely to say the very least

That alienation, along with the desire for better games, prompted me to buy an Atar Jaguar, I've owned my Jag since it became available, and have nothing but praise for the hardware and software. also feel good about seeing "Made in the USA", and "Printed in the USA" on Atare products

Atari is not going to censor their games,

and they now have a multitude of third party vendors about to deliver a deluge of awesome games including Wolfenstein 3-D, and Doom. Since I received my copy. of Tempest 2000, I have sold all of my Nintendo carts, and the money from said sales will be going into a Jag CD-ROM system when one becomes available

Not wishing to propagate the Nintendo obscenity further than necessary, I destroyed my Super NES deck with a sledgenammer, and eft it outside to rust in pieces.

To close this letter I wish to state for the record: I will never give Nintendo another penny. Their Project Reality that is alleged to be in development is supposed to be cutting-eage hardware. Who cares? If you can't play the kind of games you want to on it, the system is useless

Buy Atari. Quite simply, they are the best And Editor, why is EGM #54 the on y issue with the Jag on the top of your front cover? Better put it back to let people know you guys support the Jag!

> John Brennan Meriden, CT

(Ed. You say you bought the Super NES when it first came out, and then bought the Jag when it was released, and trashed your Super NES Did you own any system before the Super NES? Any new system is going to need time to gather a software library. The games you mentioned are not released yet. You also say that you can't wait for the CD-ROM. What if that never does become a reality? Just because it's been announced does not mean it will reach your hands. Example: the Super-NES CD-ROM. I believe you made a mistake by trashing your old system in favor of the new one. When you throw out the old one, you're putting all your energy into the new one. If games aren't released fast enough, you're probably going to get impatient. Just because new hardware is released, it doesn't mean you should destroy your older system(s). If you hold onto it, then you'll have something to play if your new system dies. Seeing the "Made in the USA" logo doesn't mean that all of the parts are made in the USA. The

For the Atari Jaguar

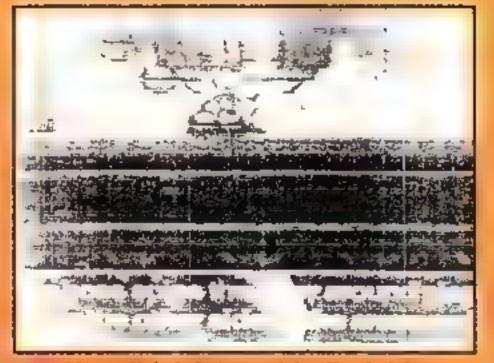

Why not start off with something that a lot of you have included in your letters. Williams Entertainment is an Atari Jaguar licensee, and Williams owns Midway, and Midway makes Mortal Kombat II for the arcade. Could it mean? GASP! that MKII on the Jaguar could become a reality soon? Here's the address of two companies you can write in an effort to persuade them to make this game on the Jaguar. Tell them why you'd like to see it:

> Williams Entertainment 2400 So. Hwy. 75 Corsicana, TX 75151

Atarı Corp. 1196 Borregas Ave. Sunnyvale, CA 90640

Atarı Jaguar is made up of parts which are manufactured in other areas, not necessarily the U.S. The Jaguar is assembled in North Carolina, at IBM's plant. Atari is also adopting the industrywide ratings system that will be introduced this fall. There aren't enough games out yet to make the judgment that Atari's going to censor or not censor their games, although it's safe to say that they won't Nintendo has let a lot of people down with promises of CD-ROM technology and 32-Bit and 64-Bit systems. No one knows what they've got going For all we know, Nintendo may actually have hardware that will blow everyone out of the water Nintendo isn't letting any secrets out, and that's good. They should definitely stop. sending out messages that they have this or that in development, when they know very well that they don't. Releasing the Project Reality now would kill Nintendo's Super NES work, and it would jeopardize their future. Same with Sega's Saturn. If they release it now, they'll jeopardize the Genesis and its popularity. That's why Sega's got the 32X Maybe Nintendo will have an upgrade as well)

A great feature to EGM is the official Bad Photocopy Contest. You'll find this contest in every Interface issue. What we did was photocopy a part of the magazine, blew it up, oh, 800% and it's up to you to find it somewhere in the magazine. VIDEO GAMES ARE

LIKE HIGHTOPS.

THE NEW ONES

ARE COOL.

BUT AFTER

AWHILE THEY

START TO STINK.

If it's not a challenge, it's not a game. You need the hottest, toughest games and you need them now. You need to go to Blockbuster. Where there's always a massive amount of the latest games for you to rent or buy. And when you've got those beat, there'll be even harder games to take their place.

WHERE THE CHALLENGE NEVER ENDS.

NEW SYSTEM WOES

A few months ago, I was happy. There were only a few good game systems out on the market, and they could all do basically the same things. But now, things have changed and I'm miserable. Several new systems have come out, each claiming that they have new and better technology that the others lack. I'm confused. Most of the new systems out there look like they have potential, but which ones are going to become popular and successful, and which ones are going to fail? I'm the type of person who likes to keep up with the gaming industry, but I don't want to go out there and buy an expensive system only to find out six months later that they've stopped making games for it I realize that in this case, it's hard to predict the future, but in your opinion, what game system out there has the most potential? Or should I just wait a few months until systems like Sony's PS-X come out before I purchase a new game system? Help!

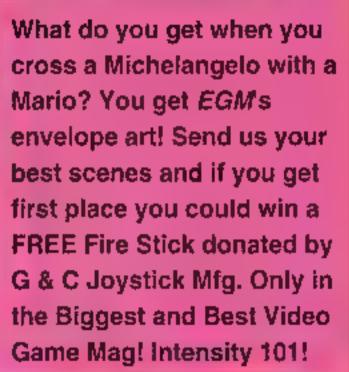

> Nathan Fountain Plymouth, MI

(Ed. The choices are getting harder and harder as more and more systems are announced and released. The way that you can decide on a next generation system is by spending the time to try it. The major video game retail outlets (Babbage's, Electronics Boutique, Software Etc.) have demo tapes of these systems in action which you may want to check out. Other electronics stores have demo machines set up for customers like yourself to try the system out before plunking down a stack of cash. Play the games and look at the other choices. A good selection of already released games and assurance that more are on the way doesn't hurt either. Talk to the people who work at the store, and call the customer service lines. Get information on each system by reading it in this magazine. Do whatever it takes, but I would strongly suggest sleeping on it before you dive in. No one can guess as to which systems will fail or succeed. The systems that have interested developers with the technology are usually a safe enough bet. But then again, wait for games to be on the shelves before you buy a system. It took the Super NES a while to get games out, and once it did, the system did well. The story is the same for the Genesis.

The only thing you have to lose playing Stunt Race FX.

Hold on to your Salisbury steak. This is gonna be the wildest ride since Aunt Bert used to drive you to swim class.

It's Stunt Race FX. The out-of-control racing game where you'll feel every turn

in your gut. Unless, of course, your gut's still back on the last hill.

That's because you've got a Super FX chip under the hood. Big whoop, you say? Well, try saying

that when you're hurtling off a 3-D cliff at 130 mph or a flying boulder looks like it's about to land in your lap. You might say, "OHNOOOO!!" or "OHNAHGAH!!!!" But we doubt you'll say, "Big whoop."

GO FOR SPEED, BATTLE HEAD-TO-HEAD OR JUST GRAB SOME AIR.

AND FORGET EVERYTHING YOU LEARNED IN DRIVERS ED.

And there's other wacky, weird stuff. In Stunt Race FX, your can block your race, pick your vehicle, and pick one

of 24 tracks—with hills, banked curves, tunnels, wild jumps—you name it. (The other guy's newest game has only 3 tracks, so about all you get to pick is your nose.)

But you gotta have a Super NES. And maybe an iron gut. So c'mon, what do you have to lose?

Well, besides that.

Boy, this sure brings back memores. All the fun of the arcade is here, plus a whole lot more. Donkey Kong has more features, including a save function, coonew cinemas mever before-seen levels, and color us no the Super Game Boy. I can stress enough how good in a game is On the plain old Game Boy. It's OK But on the TV, it really rocks! I'm buying a Super Game Boy just for this remake of the old classic.

DANYON CARPENTER

Welcome to the biggest surprise hit of the year. I had no idea that this game could offer so much in such a tiny package. Donkey Kong brings back at the best aspects of the arcade while introducing new concepts, making the game even better. A though color definitely he packed just fine on the old GB. Great job Nintendo! It looks as if you'll be selling plenty of Super Game Boys for this

AL MANUEL

This game caught me totally by surprise! As the first title for the Super Game Boy, I am very impressed the amount of color in the game is pretty amazing. I like the cute mi sical heme. And like a I Mado games, DK has some of the lithest control. The many new levels are welcome. The only reason this gets a lower score is that it's not as impressive on a Game Boy, even though it's still very good. I like this a ot!

SUSHI-X

Good old Sushi has fipped his lid I actually enjoyed a Game Boy cart. True, I played it on the Super Game Boy in bolor, but the tried-and-true Donkey Kong plays great on the portable. The levels and even the sounds were faithfully reproduced as for the graphics, I couldn't believe how close it looks. In this suggest this cart. I still can't believe I like a Game Boy cart, but then again it wasn't on a green screen.

Square Soft/Super NES

The Jolks at Square (Final Fantasy, Secret of Mana) know a good game when they see it They did RPG fans a great favor. by buying this game from Capcom of Japan and bringing it to the States. Even if you are not a big fan of these kinds of more deliberately-paced it strategy games (as | am), 'you'll still get hooked on this one! This game has hours of play involved, and just when you think you've played; it completely comething new pops, up! Excellent graphics and sound (the music is a nice touch) make this a winner

E BANG AL SUSMI MIKE

Air Strike Patrol Seta/Super NES

This military simulator is a lot like the attack-chopper Desert Strike and Jungle Strike games from Electronic Arts a slanted per spective where you must guide your aircraft through several missions. Weteran players of these kinds of flying games will immedia ately take to it, but for others it will take practice to get the game control down (being a jet, you may have to make several passes over ta target inforden to destroy it). Still, the cinemas are well done (the GNN news is a nice touch), and there are plenty of weapons to use.

7 S 4 4 7

World Heroes 2 Takara/Super NES

The Neo-Geo madness continues with another excellent conversion of an arcade game/to the Super NES platform: One advantage of this version is the ability to play as the Boss characters (especially Neo Geegus who can morph into any fighter). The speed setting is also a plus (the top speed) setting is pretty fast) and the tugof-war Survival Matches (with various hazards in their stages) have been retained from the arcade: Some moves could have used a bit more animation (like Hanzo and Fuuma's uppercuts) Overall it's a faithful translation.

Super NES Capcom
Super SFII

Fighting Release: Now
Levels: N/A 32 Meg

I'm getting a little tired of having to buy a new SF game every year. Sure this game has four new characters and a nifty Tournament whole but why get this one when you can wait a year for the next one? Super SF II plays the same as before, but the voices are norable and the graphics need a few touch-ups Capcom needs to totally redo this game to get my interest back. It's just more of the same

As much as I hate to do this, I cannot give this game an outstanding score. Why? It's simple It's not worth buying SF2 again, just for new characters and a couple of new options. Oh sure, the game plays as good, if not better, than SFI Turbo and the four add tonal characters add a bit more challenge, but c'mon already, enough is enough. Alright class, let's see if we can count to three! 1... 2. sorry!

YES! Another game continuing the SF series. The graphics are the best they have ever been and the source is near-perfect! The addition of mucho playing modes makes the game even cooler! Too bad it's not #3 though. Let's face it—although I like SSF2, I have to admit it's a bit frustrating to have to upgrade to another SF game every year and it's not the third game. C'mon Capcom! Let's get #3 out next year ... please!

As the fighting aficionado, I have to admit that this is the best fighting cart thus far. Still, I can't help but long for a new challenge, not just four new challengers. The additional guys are oun to try, but I'm looking for Capcom to go all the way and release number 3. Fighting tane-who are familiar with the sames will love it. It plays and looks as good as you'd expect. Is there enough new stuff to go buy it? Well, you decide.

Super NES Toko
Super Godzilla
Action Release: Sept.

Levels: 30

16 Meg

Super Godzilla does a good job of giving you the feel of the movies, but it moves very slow. Most players will probably get frustrated by the monsters, especially Battra. You can only hit it with a certain distance, and it keeps you coned The graphics are good and the music has some very tamiliar tunes. If you are looking for action, you'll be disappointed by SG, but fans of the movies will probably eat it up

Once again, rubber monsters threatening the city don't excite me If you're looking for a fast-paced action game you'd better look really far from here. Godz.lla is a military strategy-type game, and although Lireally dig strategy games, Livet kinda (ZZZ) fell asleep during the game. Even if you manage to stay awake and make it to a battle, you'll get ticked off by the barrage of cheap hits that you can't seem to avoid.

If I were to rate this game by how exciting it is, I would probably need to request some Vivarin. The page of SG is very slow, especially in the sequence where you must guide the big green monster through c ties, fields, and other boring grees—all just to find power-ups for him. And when you get to the stage Boss, it turns into a fighting scene that really isn't one. It's more of a strategy game. It just d dn't keep my interest.

I like the whole Godzilla thing, but this game seemed to move a bit slow. The walking scenes seemed redundant. Also, the fighting scenes with the Boss really lacked are technique that I've come to enjoy in fighting carts. However, the graphics and sounds are done rather well, and if you're patient, you might be able to get into this game. I just long for more destructive control over Godzilla

Cenesis Extreme

Battletech

Action/Adv Release: Now

Levels: 6 8 Meg

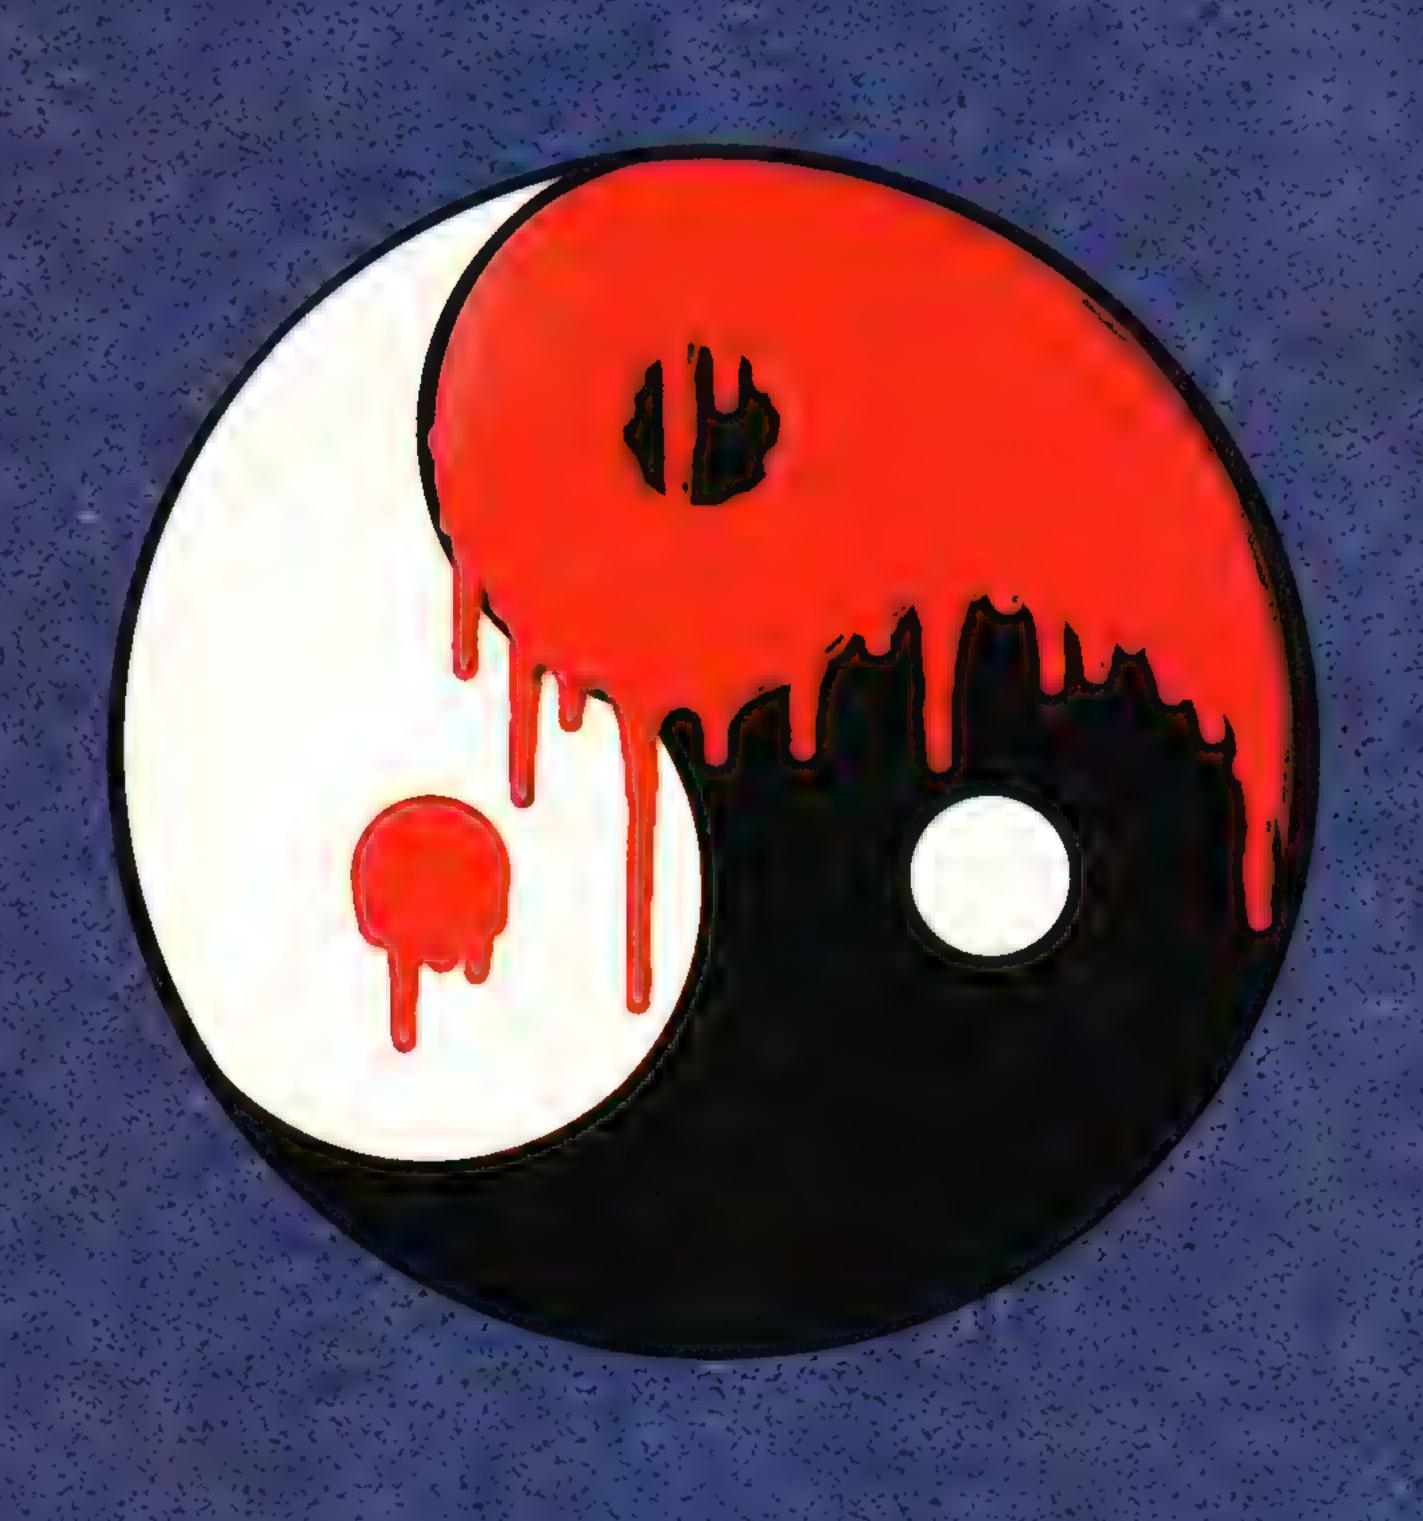

Battletech is fairly faithful to the FASA RPG/board game The diversity of the missions and enemies are a welcome sight. The One-player Mode is really difficult to play, but Two player really rocks Major and I were able to get to the fourth level working together The graphics and animation are something special. My only gripe is that you play a Clanmech, but you have no choice which one. This is one to get.

Hey, now this is pretty cook. Even though the game seems I ke it's meant for hardcore Battletech players fanyone could just get right into the act on, but only if you've got two players. The game is really tough with one player. The attention to detail is immaculate and the challenge and fun factor don't wear off, even after many hours! Battletech will prove to be a sleeper hit among action and simulation fans!

This is one of those types of games that I just can't get into. All you do is go around a field and follow a set of orders to blow up designated areas of an enemy compound of towed it to be more of a ted ous chore and got bored rather quickly. On the up side, the graphics were pretty good and I liked the awesome animation of the giant mech you pilot around The many missions should satisfy those who want a long game.

This is a game you can only really appreciate with two players—
try this alone and it will get rather maddering. This is a lot like Jungle Strike, with the stanted perspective and areas to attack. The levels get increasingly difficult as things go along. This is definitely not for all players, and some will obviously take to it more than others. I do think it's a must for fans of the RPG. It's a nice two-player incorporation.

Stunt Race FX Nintendo/Super NES

Nintendo's second FX-chip based game isn't as good as I expected. It just didn't seem to have the overall fun that StarFox did::|t1 features four racers that have noticeably different handling chare acteristics so the purists among you will be happy. The variety of tracks also prove to be challenging.\However, the game feels awkward with the touchy steering and the feeling of speed just isn't there. Overall, there are better racing games on the market, it's, ust too bad since I had high expectations for It

Art of Fighting Sega/Genesis

One of the key features of the Neo-Geo version of this fighting game was the scaling in and out during combat. That effect isn't in this version (I didn't notice it was gone until it was pointed out to me), but otherwise this is identical to the arcade (even the cinemas, between fights are kept in)! Most of the moves lare easy enough to execute, and there are some nice. options like being able to fight five rounds instead of the standard three, in the Versus Mode, some, fighters have an unfair advantage (like karate), but overall, this is an earnest conversion.

6 5 5 6 SUSHI MIKE

HAIS Fatal Fury 2 Takara/Genesis

All the fighters, all the stages, and extra options not in the arcade (like a speed setting) make this another fine conversion of a Neo-Geo title Little details (like the guy you can knock off the motorcycle in Kim Kaphwan's stage when you switch lines) are retained, as have the last-ditch finishing moves. However, the sounds could be improved (especially the dizzy sound effect and some of the voices). This is the type of game that can truly be appreciated with a 6-button controller. Excellent opening cinema, though

Sega CD GameTek

Brutal

Fighting Release: Now

Levels: N/A CD-ROM

Brutal is visually very impressive, using lots of colors and detail to make it stand out. The music is terrific, and the cinemas are the best for the Sega CD I like the way your characters build up their abilities as they progress through the game. The stort is very well thought but The actual fighting sn't all that hot making you rely on jump kicks, rather than techniques Still, Brutal is a cool game that has unique elements

Brutal throws some new ideas into the over-crowded fighting game world. The concept of naving to defeat opponents to learn special attacks is oponents to learn special attacks in open in the contender open attacks in op

From the get-go, I was in total awe of the opening cartoon sequence and other cool details of the game like the various animations of cach character through the Player Select Screen Very original. But those I got to the game I was really let down by the poor eray control. The fighters moved like moiasses and it seemed unresponsive. Maybe this whole CD should have been a cartoon from the beginning.

I have to admit to loving the look of this game. From the opening cinemas to the cute animal fighters, the pame is an eye-pleaser. It only got better when I learned the strategy of earning special moves and the elaborate story and philosophy behind the game. The problem regulation to the sluggish and the reaction time needs to be a bit tighter. It plays like a real sparing match, but gamers may not be used to this

Top Hunter

Action Release: Now

Levels: 5 110 Meg

Top Hunter is a spectacular looking game caded with lots of techniques and power-ups. This game gives you the opportunity to play in both the foreground and the background, similar to Fatal Fury. The graph caland sound are simply top cool for words. The only real flaw with the game is that you can breeze through it rather quickly. However, it's great as a one-shot deal. It's fun, but too expensive.

As with a Neo games, it's easy to get suckered in by the outstanding graphics and sound But Top Hunter required little brain power to plow through it, making it a less than idea, choice for purchasing. You will nowever, find lots of techniques to learn, strange Bosses to defeat, and excellent play control. But the difficulty, even on the hardest setting, is still way too easy It's a good quarter muncher though.

Hey! A Neo-Geo game that sn't a fighting game! Anyway, the graphics are awesome and superbly drawn with plenty of color and detail. The background music is cute and is orchestrated well to match the game. The sound exfects especially the explosions, will rock your speakers! The control is very responsive. Even though it has these things going for it, the whole concept wasn't original enough.

This game looks awesome. The characters, Bosses, and backgrounds are well drawn. To accompany its good looks are high quality sound effects and almost orchestral misic. There is plenty of technique, like fireballs and dragon plinches, to keep the play fresh it also boasts the famous 340 honbood like the Neo fighting games. I especially like the two-payer simultaneous action.

Shock Wave
Shock Wave
Shooter/Sim. Release: Now
Levels: 12 CD-ROM

I was amazed by this game I'd been expecting some cheesy full-motion game, but this is one hot the The cinemas make it seem like a movie, and the graphics of the actual game have to be seen. Plus, you can go where you want well almost. The video is smooth, and everything gives the game a dramatic teel. This game is a must if you have a 3DO. I think you'll be as surprised as I was It's an experience!

Here's another wild shooting frenzy for the 3DO! The first thing
anyone will notice is the attention
to detail in the opening cinema
with, dailed say it, good acting.
The game tself has a nice nonlinear feet to it with action and
intensity to keep you coming back
for more. As with many of the
3DO flight sims, it had touchy
controls (maybe it's time for an
after-market controller), but it's
nothing a little time can't solve

Shock Wave is an impressive title. Even though I don't like full-motion video in games, I really liked how it was used in this title it became more of an addition to the game instead of the whole emphasis. The graphics are very good as are the music and sound. What do you expect from CD? The one thing I don't like is the sensitive control when flying your ship. It takes some time to get used to but it's not bad!

I normally don't get into the flight simulator types, but this one did have impressive texture mapping and good sounds. The live-action video clips were done quite well and really added to the hype of the game. My only complaint is that the control seemed too sensitive and liard to master. Yet, it does play well and has the ability to scroli, unlike a linear one-direction flight sim. The game's great for its category.

MAJOR MIKE'S GAME ROUNDUP

MA-13 Working Designs/Seya CD

From Working Designs (Luna) The Silver Star) comes another RPG that should keep fans of the genre more than happy. This one contains huge areas to explore plenty of comrades to help you. and excellent cinemas (courtesy of the CD technology): However the story just isn't that unique krescue your love who was kidnapped when you were about to tie the knot), to catch one's attention. Gamers who aren't neces sardy RPG nuts may not be drawn to this title, but it's nice to see more games like this for the system. It has excellent music!

Who Shot Johnny Rock? American Laser Games/CD-i

Unless you have the American Laser Games Game Gun you probably won't get very far in this. move-the-cursor-and-shoot game (as was the case in the earlier Mad Dog McCree) the control pad is just too slow. For the 3DO system#Johnny Rock suffers from inexplicably substant dard graphics (the images are so blurry you can't tell what's going on at times) and frustrating game play. There is plenty of action and the whodurnit aspect of the game. is welcome but the technical, aspects hamper the overall product.,

MICTOCOSM

Shooter Release: Now
Levels: 3 CD-ROM

While this is a definite improvement over the Sega CD version in terms of color and animation, Microcosm is still not all that fun to play. The game play leaves much to be desired, and the number of instant his is almost nervewracking. The computer-rendered animation emember are really neat, but they don't make a game. I'm sorry, but Microcosm didn't seem like fun to me. It needs more to it, I guess

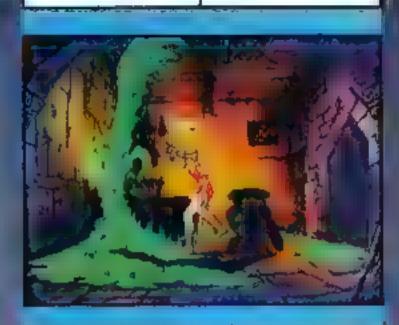

Microcosm can be considered an improvement over the Sega CD version, if you rely on your eyes only. The video has cleaned up immensely, but a pretty video doesn't make a game good. This is simply standard-lare stuff with a boring objective and dull scenery (hey, is that an aorta or a capillary?). There are better 3DO games to be found. But if you want to experience it all, Microcosm just doesn't thrill me.

Even though the 3DO games have been getting better, I can't believe that this game is among them. Microsom is nothing more than full-motion video and predirected paths for the player to pilot through there's no interaction at all All you do is more a ship up, down, left, and i ght living at enemies while avoiding obstacles. It's just not fun. The graphics and sound are very good, but they don't make the game.

The concept may be good for a movie, but the repetitive backgrounds and tack of challenging game play made the fun of this one wear out fast it looks better than the Sega CD version, but the scenes are repetitive. The action is limited to simple four-way movements. The graphics and sounds are impressive, but it doesn't play very well. It doesn't have enough action for me

Dragon's Lair

Adventure Release: Now
Levels: N/A CD-ROM

Dragon's Lair is a near exact match to the original coin-op DL, plus it has a few new graphic elements added to it. The graphics quality is identical in every way. If you've ever played the arcade, or any of the other versions, you'll notice that the timing has been changed a bit of don't know quite why. This is a great game to show off to your triends if you have a CD-i. It's good, but the timing needs help

This is the best playing, best looking, best anything home version of Dragon's Lair out thereperiod! The digital video is absolutely sturning and the audio tracks are superb. The whole daring adventure of Dirk is a riotous romp through coloiful levels of mayhem. If you've never taken it upon yourself to my this game, you oughta smack yourself! The one drawback is that the replay value is easily diminished.

This version of the laserdisc arcade classic is without a doubt the best version on any platform. Everything from the arcade has been directly ported over. All the scenes and music are here! Another thing that makes DL so good is the time control of Dirk which allows players to choose his moves with ease. On the down side, the CD access time is a nuisance breaking you away from the game too long

This is probably the best playing version I've tried yet! Most versions of the game played really bad, but this one was more bearable. The moves still have to be tapped rapidly to make sure they are "counted," but it is accurate if you know how to play. The graphics and sounds are superb, as you'd expect from the system. Access time isn't too bad but the Stats Screen does get annoying between each level!

Sonic Spinball
Action Release: Now
Levels: N/A 4 Meg

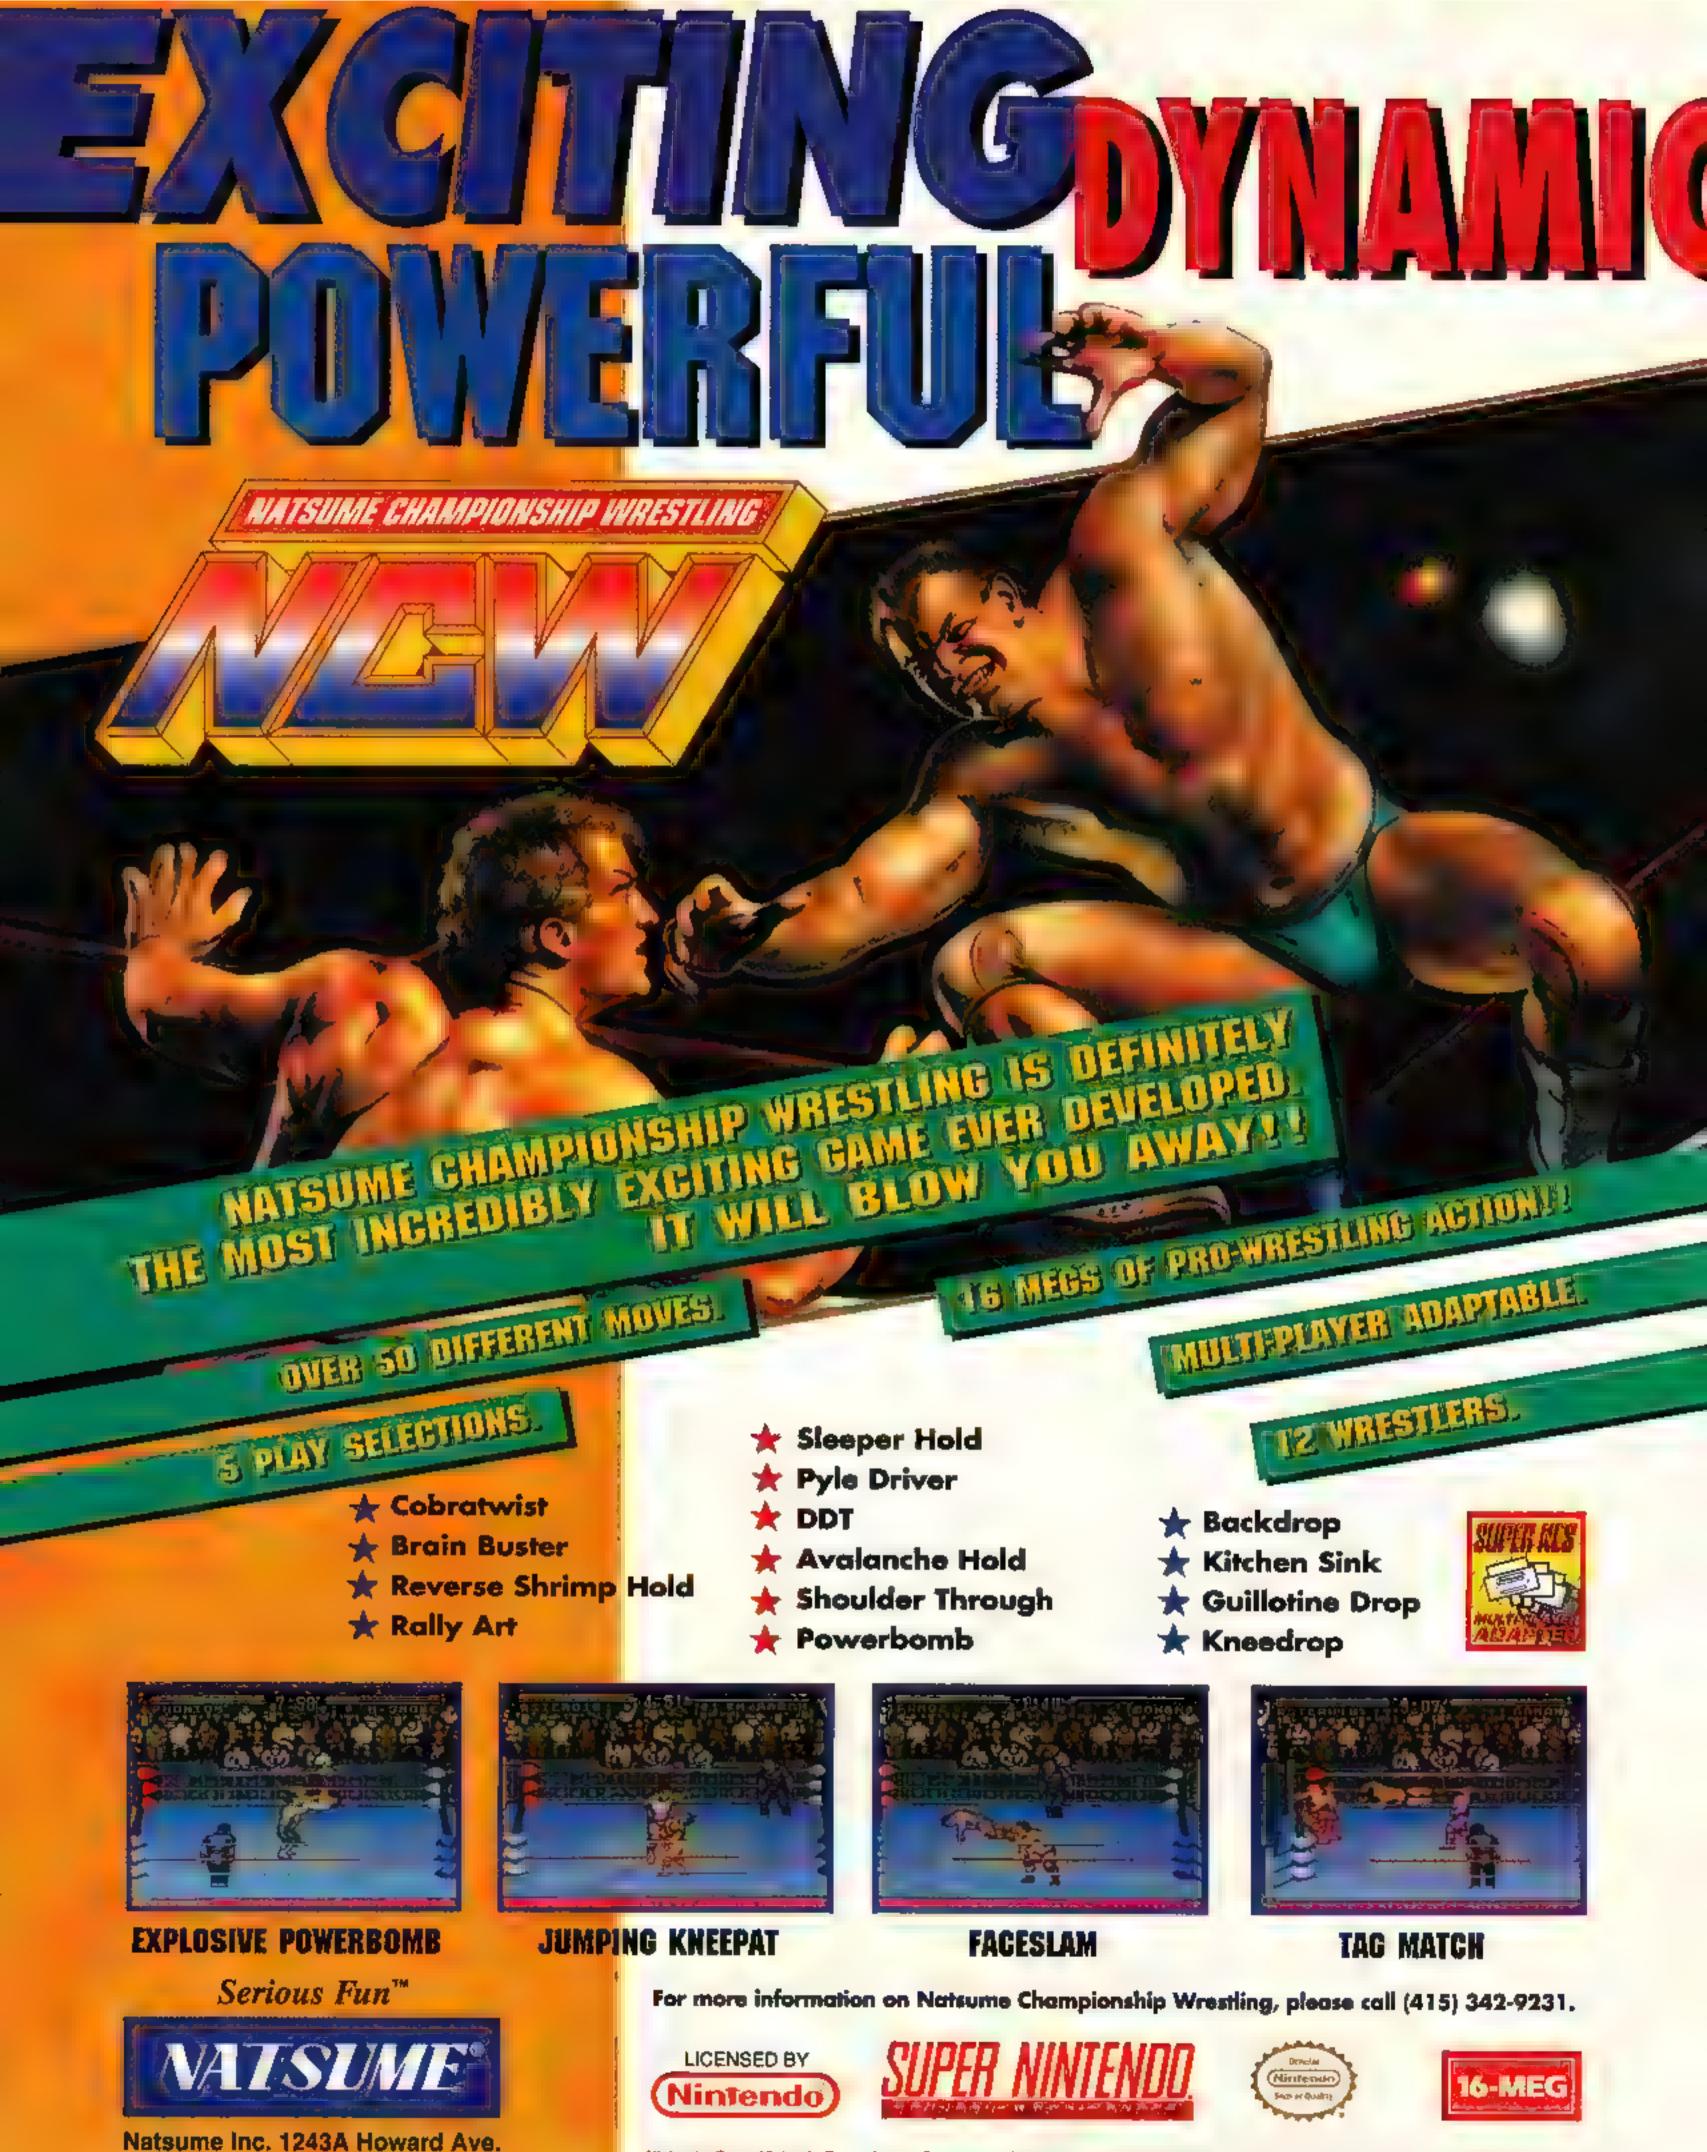

Sonic Spinbail leaves much to be desired. The graphics are dark, and the audio is poor. The game play is very poor into it doesn't control half as well as it should. The game gets trustrating after a few minutes of play. There are too many ways to die. Once you hit the "leg with the flipper, you virtually have no control of where he goes. It doesn't even have the pinball feel to it. I'd pass on Sonic Spinball.

Sonic in there doesn't help matters much. The most noticeable problem is that the screen is jerky as it scrol is are much. The levels are pretty cool and there's a lot to interact with but the game just isn't a whole lot of fun to play. Although pinball games typically don't offer much control of the game, Sonic Spinball offers even less with its poor control and boring plot line. I pass

Sonic Spinball is an original concept blending elements of Sonic and pinball. Unfortunately, it falls short on funding game play. The left flipper being the 'i' button is a hindrance and should have been on the control pad it was just difficult to play, especially with all the blurs that you must squint through. Many times the ball seems to move to the same location when you hit it, making progress slow. AARGH!

I liked the Genesis version, due to its change of pace for Sonic. I've played pinball for years and enjoy its play mechanics but on video its hard to recapture the "feel." The graph is look good, but it can get blurn. The biggest pain is both buttons being so close that they have to act as the flippers. This goes make it a bit awkward to play. Yet, the game is a fun portable with big levels. Good for pinball fans.

ATARI TAKES SHOW WITH DINO-MK2...

...Hello, my many disciples of gaming wisdom. Your master of all that is interactive is here once again to fill you with the latest behind-the-scenes info from the guru's domain. Having just returned from the CES, yours truly has pledged to fill this space with the sights and sounds of the bi-annual get-together and take you in for a trench run of the hottest softs the Windy City has ever seen, or at least wished for. Let's get it on ... With the Sega war machine taking a breather now that Nintendo has been put in its place, you'd think this year's show was less than a CES. Buzzzz. Wrong answer Hans! This CES—while different for the Q-Minator—was transitional in almost every respect, ushering in the age of Hollywood big-wigs looking for the quickest on-ramp to the information/entertainment super-highway. While the Q toured the show, the big biz was going on behind closed doors where new hardware and even newer softs were keeping things in perspective for the people who are buying the games you'll be playing in the months to come ... Sega's basement extravaganza was cramped, and they managed to rustle up only a few new Gen and Game Gear titles. Although the 32X looked good, only Virtua Racing Deluxe and Star Wars Arcade were even barely playable. Everything else was demo, demo, demo. Impressive, but I don't think even three games at launch will be possible. Virtua Racing Deluxe is solid, with a fully-shaded car that looked like it was pulled from the arcade ... After leaving the bowels of CES, the Q overheard some people talking about Capcom and plans for a Super SF2 Turbo on the Super NES and Genesis for release this Christmas, at least in Japan. I wonder...

...Did I say Sega thrashed Nintendo? Buzzzz. The Summer CES was 100% Nintendo domination! Not one to judge which system is better, the Quartermann couldn't help but think that Nintendo just popped the white shirts at Sega in the chops. Thanks to DONKEY KONG COUNTRY, which may be the best 16-Bit side-scroller ever created for a game system, with a nice follow-through courtesy of the Ultra 64 (does this sound like a gas or what?), Nintendo shined like they did so many years ago. Actually, the Q thought the Ultra games on display were a little short on the "Wow" factor, but take a look at some of the early Super NES games and where that system has gone since them. On second thought, look at Pilot Wings and F-Zero ... Speaking of Nintendo, get set for Star Fox 2 later this year ... Best line of the show: "Is that Ed's dress?" ... Can the 3DOA be revived? Not if they keep getting booth space on the other side of the convention! For those who were adventurous enough to make the hike, the company dished up Off-Road Interceptor, Gex, and Samurai Snodown. But what's this? Capcom's doing Super Street Fighter Turbo on the 3DO?...

...Atari?! Games that I had perceived to be complete were going buggy at the show. Atari had Doom out the first day, but removed it, because it would crash every minute or two. Ultra Vortex looks good, as does Kasumi Ninja, but they need to get the games out. Look at AVP, Redline, and Club Drive. They should have been finished months ago—you've been holding onto them forever. No word on MKII, but in this issue's Interface, you can try to get it started by flooding Atari and Williams with letters ... The next generation of Power Gloves looks to be looming, with the Aura Interactor vest thumping your chest whenever Blanka takes a poke at your on-screen alter ego! Can you believe a defense contractor thought up this one? VR systems were all the rage, but with the notable exception of Forte's PC unit (INCREDIBLE), the rest were harder to interact with than the games you're supposed to play on them ... T*HQ showed the Catapult modem, a device that's supposed to let you plug into your buds for some one-on-one wherever you live. The piece costs the same as a game cartridge, lets you use any game, and costs only about 10 bucks a month to log on to the system ... Acclaim showed some early stuff on their Alien Trilogy game that had some great synthetic actor action. They also announced that the first entry from their team-up with comic publisher Valiant would be a high-end coin-op developed around Turok: D.nosaur Hunter ... Look for big changes at Virgin...

...Wrapping up the big SCES package for you, I present my picks from the 1994 SCES. PICKS: Donkey Kong Country (Nintendo/Super NES). Earthworm Jim (Playmates-Shiny/Super NES & GEN), Mortal Kombat II (Acclaim/Both systems are great), Super Punch-Out!! (Nintendo/Super NES), Ranma 1/2 II: Anything Goes Martial Arts (Toho/Super NES), Catapult's modem, and Dynamite Headdy (Sega/Gen). The real thrill of the show, was not a home game at all. Atari Games, buoyed by some of the hottest talent this side of Coordinated Universal Timeline, blew everyone away with the scorching new Primal Rage. Dinosaurs meet MKII with lots of blood, venom spitting, and cave people to munch. Look for the home version sometime in '95. Why didn't I think of that...

SEGA'S SATURN: 32-BIT INTENSITY

This is a demonstration of the scaling and rotation in Daytona USA.

Sega's Saturn game system debuted at this year's Tokyo Toy Show, and got more than a few double-takes. This powerful 32 Bit system is set to take Japan by storm, and it should make its way to the U.S. soon after. With games that look absolutely amazing, Sega may have their work cut out for them.

The Saturn arcade stick looks really good. For you fighting game fans, six buttons will make all the difference. As you can see below, the stick is made to recreate the arcade experience at home.

The Saturn has not been announced in the U.S. as of this date, and Sega

Sega displayed a new six-button controller for the Saturn.

isn't saying a word as to when it'll become a reality. So we may be a year or so away from experiencing this futuristic system for ourselves.

Daytona USA is one of Sega's newest coin-ops, and the demo they were running was of the coin-op game. What they did show was a small Daytona demo with a car racing around a track with SEGA written everywhere. Not much for a system that will supposedly be released in Japan this November.

Virtua Fighters was still incomplete, with only about 30-40 percent actually finished. When it is finished, it is expected to be a carbon copy of the arcade game

Clockwork Knight is a side-scrolling action/adventure title where you star as the Clockwork Knight, and you must save the rest of the toys from an evil presence. You do this by using an attack that winds down the enemy's gears. The backgrounds are nicely animated, and the characters are drawn in great detail. This is one game that will be fun to play when it does make it out.

Gail Racer made an impressive debut as well. A racer that is similar to Sega's

Sega's Saturn system is here! Catchy logo, stellar name, and Sega all-over.

Clockwork Knight is side-scrolling happiness! Wind me up!

Rad Mobile, it scales and zooms with no interruption. It looks very good.

Chinese Detective is an intense super sleuth mystery game. You are the detective, and you can pick up and look at any object you want to, from any angle. Look for clues, and solve the mystery.

Blue Seed is an anime RPG that includes intense cinema screens. Will it top Lunar?

The same story for Magical Knight Grey Earth, which also uses anime cinema screens.

Rampo is an RPG as well, and it features an intense plot where vampires lurk in a rural village. The cinemas look good, but will the game be good as well?

SimCity 2000 will also be making an appearance on Sega's new machine. What they showed were shots of a PC version, but the Saturn one will be worth checking out.

SEGA-CD owners asked. We listened. Now, it's here... THE SILVER STAR True Role-Playing

SEGA'S SATURN GAMES GO FOR BROKE

Blue Seed is a fast-paced RPG with anime cinemas.

In Chinese Detective you can pick up objects in real time.

Daytona USA is a carbon copy of the arcade.

Gail Racer is a racing game in the theme of Rad Mobile.

Panzer Dragon is the game you've been seeing for months now that has a first-person, real-time flying perspective. You look ahead, you look behind you, and there are enemies everywhere. It's shoot first or be shot—play it to win

Golf goes to 32-Bit in Sega's Pebble Beach Golf Links. This realistic golf game puts you in the thick of the action. Are you ready for the ultimate golfing challenge? It has great graphics, realistic maps and scenes, plus digitized golfers.

Shinobi X isn't pictured here, but a few quick shots were shown at the Toy

Show. Full-motion battle cinemas and more Shinobi than a game player would need. It's sword-slashing action.

With all of these great looking titles ready for action, the Saturn is sure to find a niche in the market. Sega's games were unplayable at the show, and how they expect to have more than a handful of games ready at the system's launch is beyond the imagination. If they've got the programming to carry it out, then they will most surely succeed.

If they cannot match the quality of their arcade games with the home translations, then game players will be disappointed. Sega's got to keep the games as tight and as accurate to their arcade counterparts as possible.

One of the leaders in the 16-Bit game race is finally going to make the jump to 32-Bit. Will they succeed or fall?

In Japan, gaming is a totally different market, and gamers will probably buy the first round of systems and games, but if Sega can't get the games out fast enough, like with the beginning of the Mega CD, then the Saturn will be short lived.

You can see the games here, and they all look great, but will they play as good as they look?

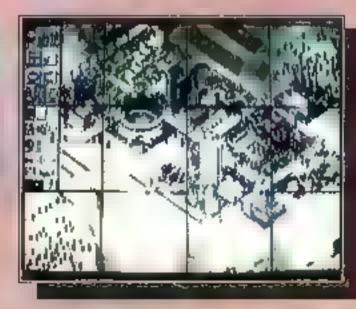

Everyone knows by now— Virtua Fighters!

Look at the scaling in Gail Racer. You pass under the bridge, and up onto the bridge. The camera takes you everywhere. These graphics are absolutely amazing! The Saturn has the power and capabilities to perform amazing effects. I wonder what MKII would be like on this?

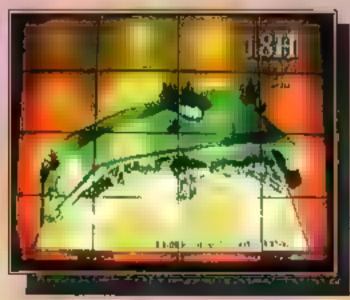

Not a SimCity clone, but SimCity 2000.

Panzer Dragon is a first-person flight shooter.

RPG gaming at its very best in Magic Knight Grey Earth.

Pebble Beach Golf Links is a game for armchair athletes.

Rampo is an RPG mystery with vampires to boot.

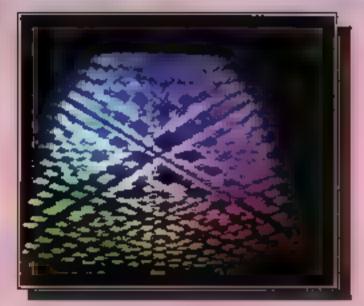

SONY PLAYSTATION COMING TO THE U.S.

Sony's machine can rotate all of these objects.

You're getting closer to something—cubes!

This fish is so lifelike, and it's possible on the PlayStation.

This dino looks angry—all done on the PlayStation.

Newly-formed Sony Computer
Entertainment has announced that the
PlayStation is coming to the U.S. The
system uses an advanced CPU chip
set developed by LSI Logic, a world
leader in high-performance semiconductors.

The PlayStation employs a 32-Bit RISC processor, an advanced 3-D engine, and a decompression system, MDEC, which is based on JPEG, delivering full-motion video that is unparalleled.

The graphics engine, GPU, can generate lifelike, three dimensional images with up to 360,000 polygons per second. It can also move up to 4,000 sprites in a field. That means the PlayStation is capable of high-speed simultaneous movement of characters and high-quality backgrounds, comparable to television transmission.

"LSI Logic's enabling technology plays a major part in Sony Computer Entertainment's plan to create a dramatically advanced, high-performance video game system," said Teruhisa Tokunaka, deputy president of Sony Computer Entertainment. "Using the

PlayStation CPU, the PlayStation system will claim market leadership by offering superior game play dimension, response time, and processing power."

"Integrating the various functions required for high-performance game play allows us to give Sony Computer Entertainment a performance edge in the interactive video game market-place," said Brian Halla, executive vice president of LSI Logic's Products Group.

Sony and LSI worked closely together to get the PlayStation's CPU to perform above the rest when it comes to next-generation entertainment.

"Marrying Sony's unparalleled expertise in developing consumer electronics and entertainment products with LSI Logic's innovative technological systems will result in a video game hardware product that is technologically superior to anything else planned to be on the market," said Wilfred J. Corrigan, chairman and chief executive officer of LSI Logic Corp.

"The combination of the PlayStation's incredible speed and real-time processing ability makes it possible for

game developers to create revolutionary titles that realize their vision for game play," added Tokunaka.

According to Sony, the PlayStation will have close to zero access time, no flicker or slowdown, and has the power to recreate arcade games perfectly. The squares and spheres in the pictures above can be rotated and moved in all different directions, with no slowdown or flicker.

With the question of a rating system on all video games soon to become a standard, will Sony use this ratings system on PlayStation games? The answer is yes, Sony will most likely go in the direction of the rest of the industry, which would create a universal rating system.

No third party licensees for the system have been announced in the U.S., but they will be soon.

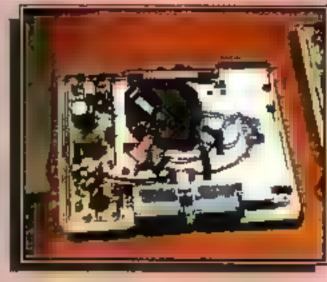

In Japan, licensees such as Capcom and Namco have already signed on. Ridge Racer and Cyber Sled are both games which Namco is already developing in Japan.

Not a game, but a demo of what Sony can do.

This character may be how we look at RPG actors.

The guts of the PlayStation look pretty technical.

SONY PLAYSTATION IN U.S.

With many new systems coming out in the next few months. Sony may have a bumpy road ahead of them. A price for the U.S. PlayStation has not yet been announced, but the Japanese version of the system will not go for higher than about \$480.

If this price is the point at which the U.S. PlayStation will come in at, will Sony be able to become the leader? The 3DO is an example of great hardware that is priced a bit too high for the

consumer
market.
When

The PlayStation can produce mind-boggling effects.

rocky, but OK start because of its \$299 price tag. Since that time, Sega dropped the price, added a different game, and the system has sold well.

The PlayStation will be one of many new systems, which include Nintendo's Project Reality and Sega's Saturn, according to Sony, and their demonstrations prove that their machine is technologically advanced. The games that they have planned in Japan, however, would not find the popularity in the U.S. that they would there.

Capcom has announced a fighting game in Japan, and Namco has Ridge Racer and Cyber Sled, which will attract arcade gamers. Are arcade gamers going to give up the quarter-crunching versions for armchair ones? The feel of the arcade Ridge Racer is a unique one. It has to be brought home in a way that will satisfy the arcade gamer.

The PlayStation is a double speed CD-ROM system. CD-ROM, up until this point, has not been as fast in the access department as cartridge systems.

Sony has stated that the access time will be close to zero, as if you're playing it on cartridge.

Will third parties make the games that spell success for a new system? The 3DO has a lot of third parties but those third parties have not all made games for the system. Sony said that yes, there will be many third parties making lots of games for the PlayStation.

Can the controller go diagonally? While this isn't a really big question, it is still one that many may be pondering. Shooters and action games demand a controller that can move in eight directions.

It's up to the consumer to make this system a hit. Sony has provided the gamer with superior hardware, and the games from Japan look very impressive. The demos that they showed also looked very good.

When you've seen this system perform, as with the dinosaur demo and the character that looks straight out of a Japanese RPG, you will see that this could possibly be the next really big gaming platform.

Since Sony is waiting for a good amount of Japanese arcade translations to be ready by the time of the U.S. launch, there is almost no doubt that at least more than a handful for great titles will be ready and waiting for

choice. Sony is hoping you'll choose the Playstation. With the graphics that they showed in their demos, it looks as if the Playstation will be a major contender. Now, what will you decide?

Sega's Genesis 32X add-on is set for a fall release, and games are being readied as you are reading this. Many of the games show off the 32X's ability to scale and rotate objects smoothly, whether they are polygon or texture mapped.

Sega expects to have six games at the launch, and 10 more released soon

after They have both 32X cartridge and CD games in development.

Metalhead is a battle game where you control a huge Battletech-type robot, and you go up against a computer opponent.

Deadlus looks like a shooter, similar in theme to the hit Sega CD game, Silpheed. If it plays as good as it looks, I think we're in for a treat.

Star Wars Arcade is a direct translation of the polygon shooter coin-op. Sega touted that everything present in the coin-op would be retained in the 32X version, but the demo running at the Tokyo Toy Show was presumably the arcade game.

A new side-scrolling action/adventure title called Tempo is also scheduled to be out soon after the system's release. The game is set on Planet Rhythma, where an evil space octopus named King Azolos brainwashes all of

Tempo's insect friends. Tempo has CD quality sound and cartoony graphics. Sega may have a new mascot.

Speaking of racing, Sega has also announced Virtua Racing Deluxe on the 32X. It looks more defined than the Genesis version with shaded polygons and fast-paced action. Six courses and three different cars to choose from will make Virtua Racing Deluxe a must-have for racing fans.

Fahrenheit is a Sega CD 32X game, which features a full-motion video story line that is similar to that of Backdraft. You must do whatever it takes to save lives and escape burning buildings.

Midnight Raiders is also a 32X CD game, in which you pilot an AH-64 Apache Attack helicopter to rescue a government official. It's an adventure,

The classics always seem to worm their way back when a next generation system comes out. Two classic Sega games, Afterburner and Space Harrier, have been updated for the 32X. NEO-GEO CO BRINGS ARCADE HOME

The Neo•Geo CD system was unveiled at the Tokyo Toy Show, and it looks promising. It is a stand-alone machine, so you do not have to own a Neo•Geo to purchase the system. It is designed for the home market At the show, they were showing a demo of Fatal Fury 2. The prototype of the machine that they showed was single speed, and the load time was 14-28 seconds between rounds. You can see that the screen on the right is a load screen.

Sleek, stylish, dependable. No, it's not a car, it's the Neo-Geo CD!

Fatal Fury 2 on the Neo•Geo CD.

Load time may turn out to be a problem.

Here in the U.S., SNK is considering releasing the system at an affordable price. Chad Okada of SNK commented that the system "would need to be set at a price that consumers would accept." He could not give a specific price, but he said that it should be set somewhere around \$399. Mr. Okada also mentioned that "to my knowledge, it is double speed." Whether the system at the Toy Show was a quickly produced prototype is not known.

As for the titles to be released on the system, Mr. Okada said that they are porting most of their titles over to CD, with the exception of older, less popular titles. These will also be priced at an affordable range, somewhere around \$50. Maybe SNK will produce collections of older titles on CD.

What about the controllers?
Since this system is made for the home market, the joysticks are smaller, and easier to handle during fierce game play. Will regular pads also be available?

Mr Okada added, "The third party companies are now really excited. Games can be made for home, arcade, or both"

SNK hits like Samurai Shodown and Fatal Fury Special will finally be open to all, and new games just for the home version will be made.

PRIMAL RAGE by Atari Games

Well hello there! Good to have you all back for another installment of Arcade Action! The Arcade Man has gotten the lowdown from Atari Games on their incredible new coin-op fighting game. Primal Rage.

This one's a scorcher! You can choose from seven different creatures to help you gain full domination of "Urtn," a surreal, primordial place where giant beasts roam (sounds a little like your school, doesn't it?). Each of these seven characters possess over 70 moves including some particularly devastating special moves.

Arcade operators can choose to "tone-down" the level of gore, if they wish.

The real story with this game, however, is the stop-motion animation that Atari Games uses. When you first see Primal Rage in action, you are going to freak out! The beasts are awesome! The sound comes via the new Cage "Total Immersion Audio" system which bathes the players in a lush, full audio experience.

Time Warner Interactive, Atari Games' parent company, is planning to release Primal Rage to the consumer market sometime in 1995. Until then, go to your favorite arcade and prepare to go primal with Primal Rage!

Pick your character from a sizeable roster of seven possible combatants.

The stop-motion animation provides the fiercest, most realistic graphics around.

The special moves are only the icing on the cake! Each player has 70+ moves!

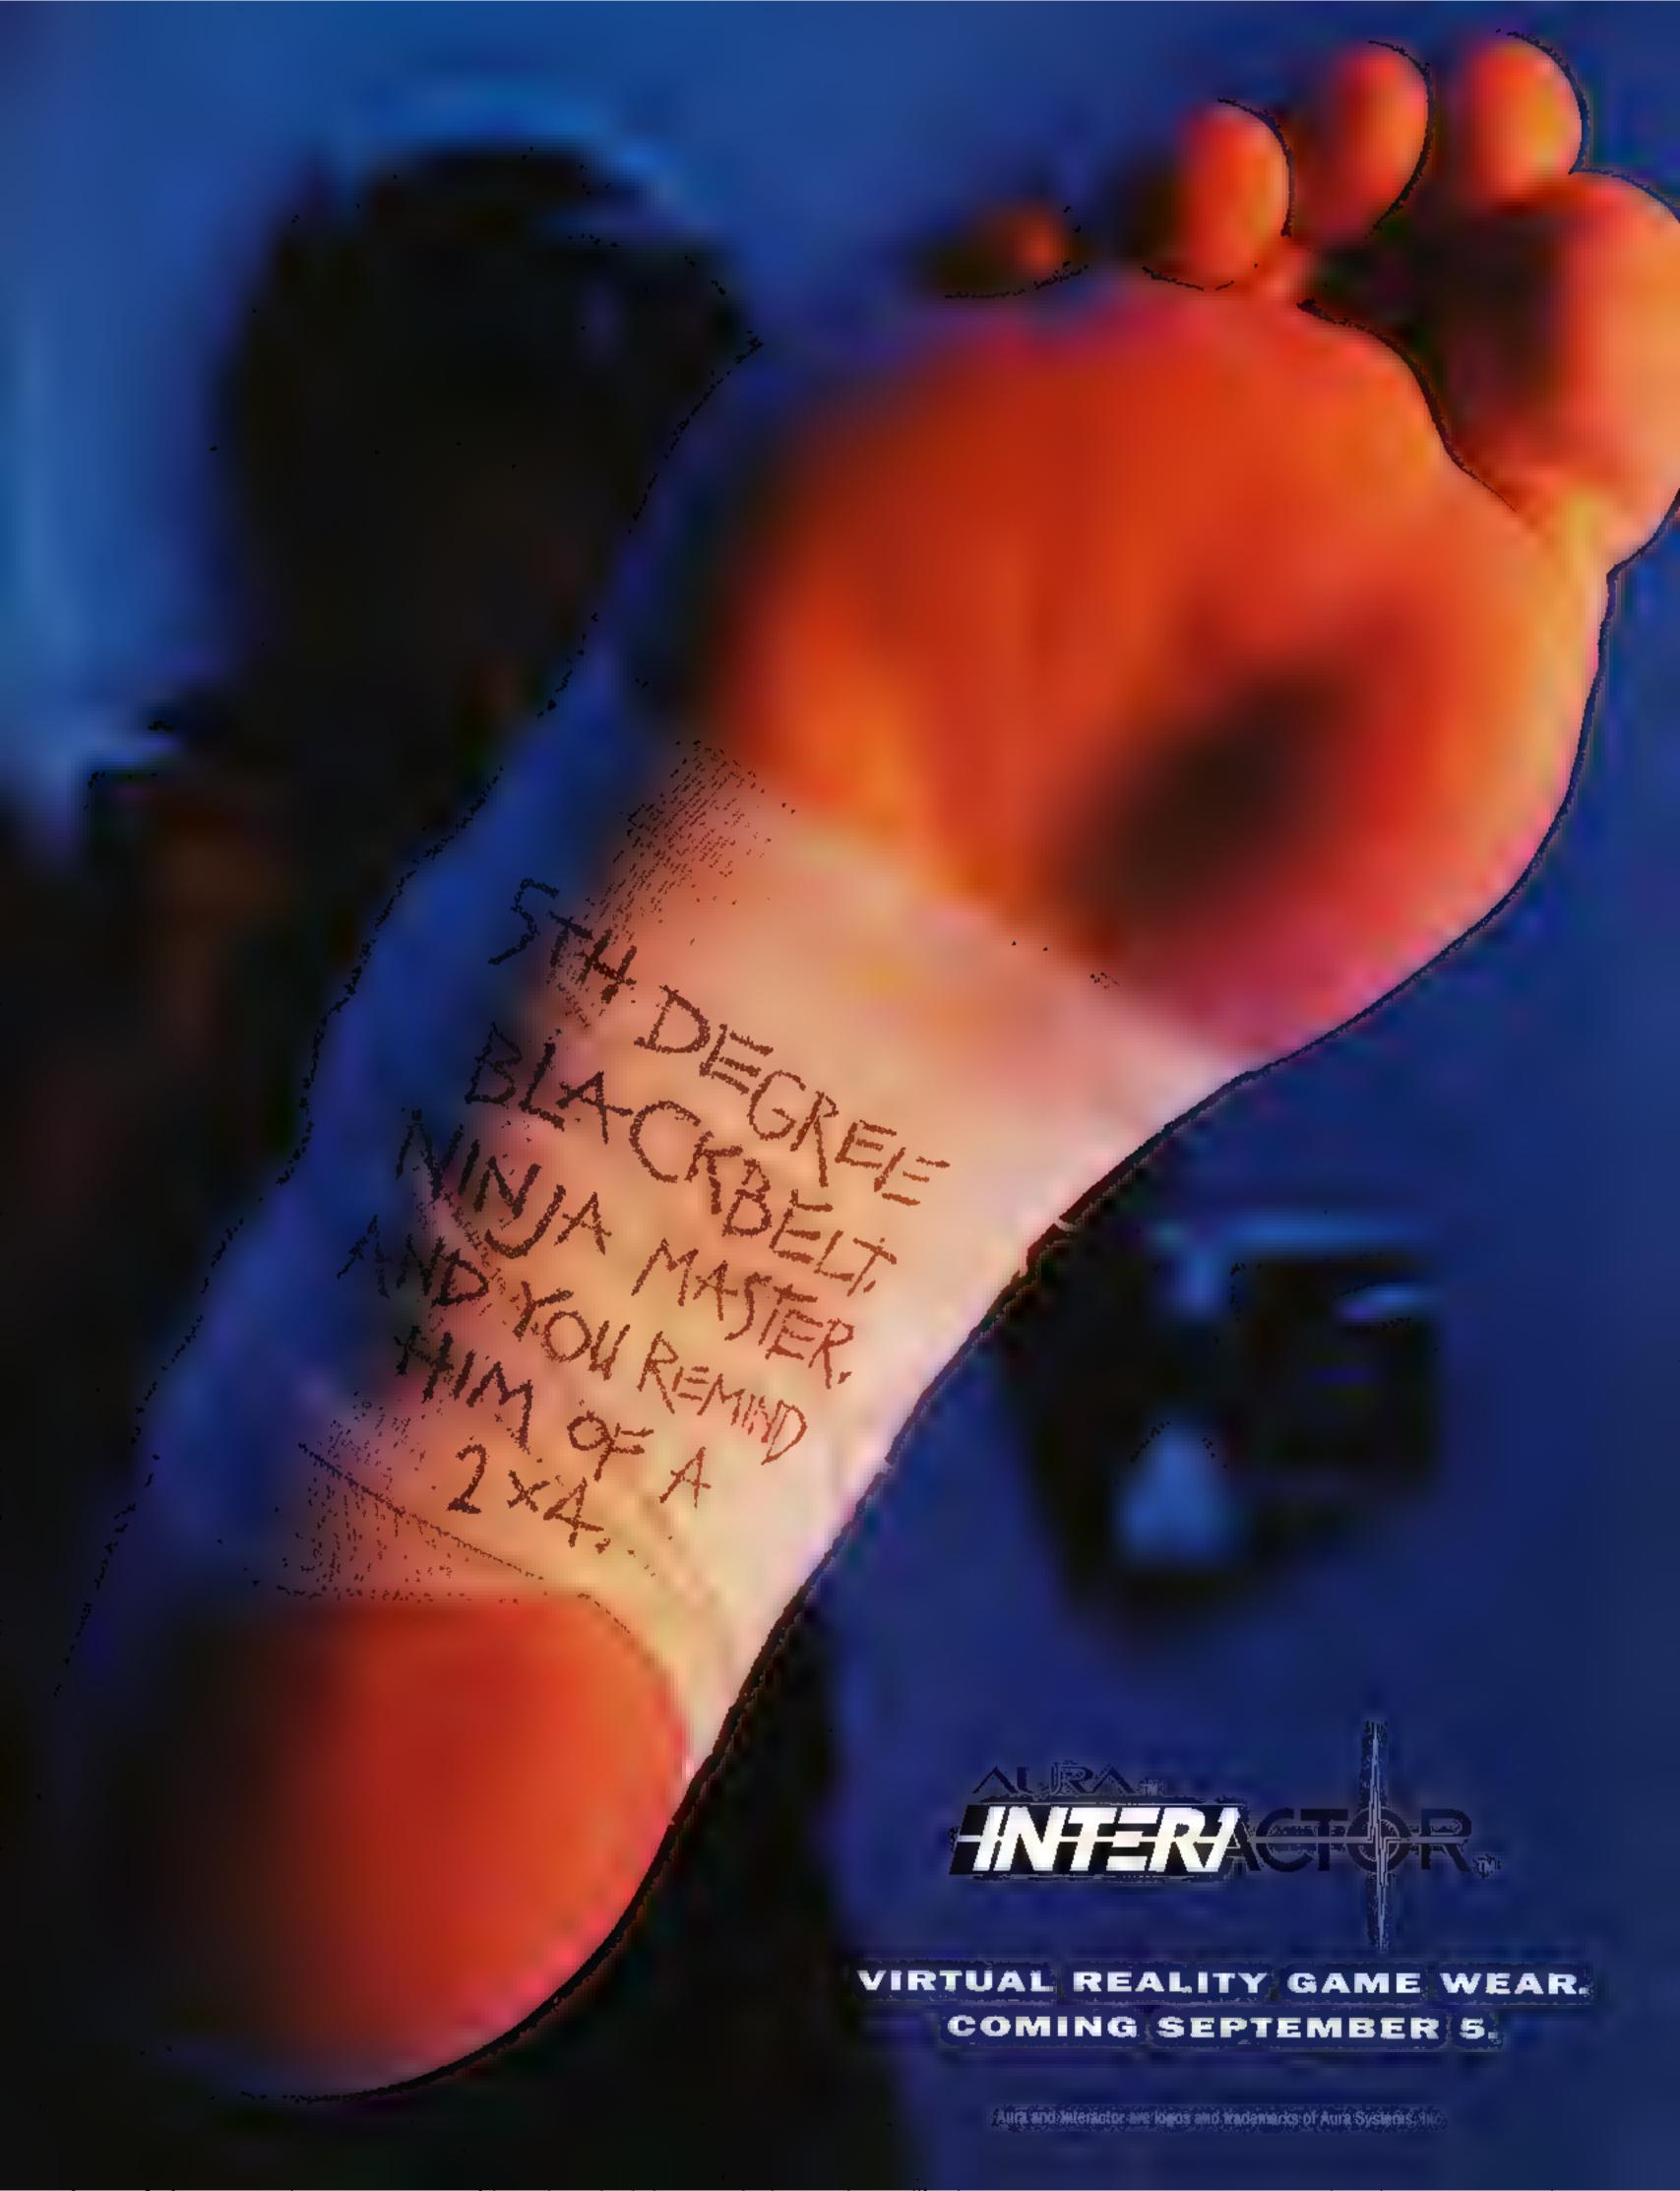

Each fighter has his/her own fighting style, as well as strengths and weaknesses.

Get ready to experience a new type of game. Get ready for Primal Rage!

JOE 6 MAC RETURNS by Data East

The boys are back with another prehistoric adventure in Joe & Mac Returns.

You must club your way through each level in order to rescue the cavewomen.

Each level ends with an encounter with a deadly, but whimsical Boss creature.

There are over 70 stages in all, each with a Bonus Stage at the end.

Joe & Mac Returns by Data East is an action game featuring those two loveable cavemen!

They're two
neanderthals with a
job to do—beating
up the bad guys
and rescuing the
cavebabes.

With over 70 levels in all, this job is a lot easier said than done! Each stage pits you

and a friend against a multitude of creatures like pterodactyls, triceratops, and other primitive monsters.

Control is through a joystick and two buttons, one for jumping and one for attacking. The graphics are well drawn with Joe and Mac displaying some very humorous facial expressions! The enemies that you'll encounter are guaranteed to make you smile!

Joe & Mac Returns will be released in America, but let's hope that it is! <u>Unk!</u>

VIRTUA COP by Sega

Virtua Cop features beautifully rendered vector graphics for added realism.

Here they are! The first pictures of Sega's latest installment in the Virtua series. This one is called Virtua Cop and it really looks cool! As you can see

But you can get your hands on a few key pages.

Troy Aikman NFL™ Football™

Like Page 7, Troy's "Pitch", the play that turned the Bills into four-time losers. And Page 21, Troy's favorite — "Lookie", the one that's made a lot of NFL cornerbacks consider a career change.

With Troy Aikman NFL™ Football™ you get the best of Troy's favorite Superbowl winning, defense spinning, top secret, confidential, straight-from-the-Cowboys-playbook plays.

And if Troy's favorites on top of more than 50 offensive configurations aren't enough for you, with Troy Aikman NFL Football you can custom

design your own plays. Even custom design your whole team. A unique reserve budget, "Team Setup", lets you allocate team funds. So if you want a grind-it-out ball-control offense, invest in a monster line and a power fullback. You want a smothering defense, throw your linebackers a couple mill.

Troy Aikman NFL Football gives you everything you need to build a winning team. Especially Troy's exclusive straight-from-the-Superbowl champion Cowboys' playbook plays.

You don't just get any offense, you get Troy's offense, with Troy's favorite plays. Now you're headed for the Super Bowl!

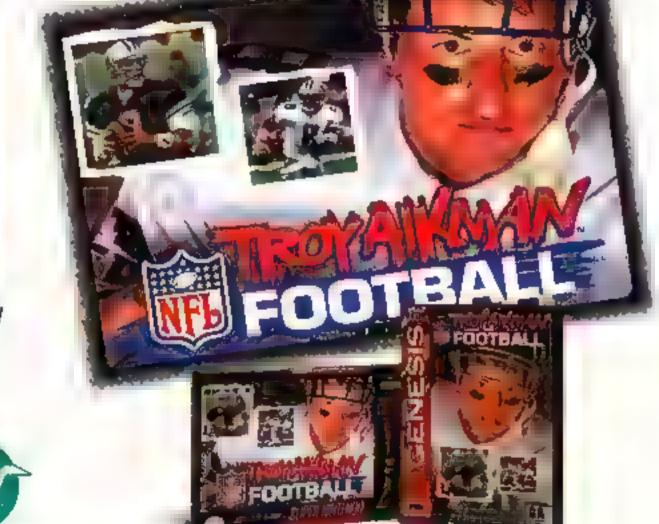

Only Troy's game lets you control your team's budget. Beef-up your offensive line, secondary or any other position—just like the pros!

INTERNATIONAL

The video game scene is really heating up beyond belief. You'd better believe it, with the NEC 32 FX, Sega Saturn, and Bandai BA-X all up and running. At the Tokyo Toy Show one could see all of these new products

The Saturn had a great showing with plenty of games shown on video, and a couple actually up and running.

The NEC 32 FX had two fighting games, Battle Heat and FX Fighter. These use new types of interactive cinemas to play out the rounds of fighting.

The Bandai BA-X was an interesting system. It was pretty much like one of those choose-your-own-path books. A cartoon, like Dragon Ball Z 3 would play, then it would stop and give you a choice of what the character should do next.

Games like this for the BA-X let you choose the path of your heroes.

Almost two years after the original release date, Seta finally appears to have completed this gothic horroraction game. When you check out the intense screen shots, you'll have to agree that Seta poured a lot of time and dedication into getting the looks of the game perfect for capturing the spooky atmosphere of the vampire legend.

The hero of the game is John, a young man in Europe, out to rescue his love who has been kidnapped by Count Dracula. She will be a blood sacrifice for opening the gates of the netherworld. John must work his way through horrifying dungeons and castles infested with supernatural beasts and beings, not to mention deadly traps and maze-like corridors. (The game does share similarities with Prince of Persia, but the heavy, doom-laden atmosphere is entirely its own.)

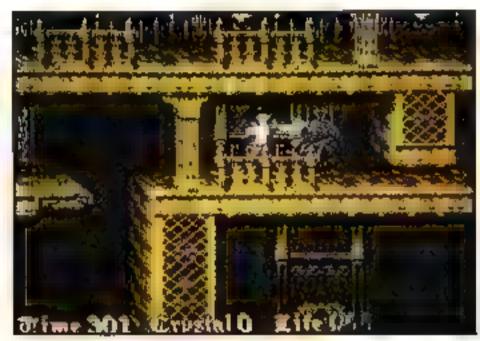

The amount of detail in this game is simply amazing. For example, Seta

prepared over 350 graphic patterns for portraying John's movements. In fact, they take up four megabits out of the 16 in this game.

The backgrounds and creatures are all drawn with impressive detail, so much that it appears that digitized images have been used. It's been well worth the wait.

At the '94 Tokyo Toy Show, Konami of Japan had a very nice surprise in the form of Spacenauts. Spacenauts looks like an interactive drama along the lines of Snatcher. In fact, the art style looks very similar. If you look at the pictures below, you'll notice that they look quite good. That's because Spacenauts is for the 3DO system!

While we weren't able to see a lot of this title, what we did see looked really cool. With Konami behind this game, you can be sure that this will be as addictive a mystery as the great game Snatcher was.

hottest things to see were the Sega Saturn,
the Bandai BA-X, and NEC's new 32FX. All
of which were up and running. In terms of

able to see what I think is the hottest stuff.
Some of the best games included Super

Ristar is a meteoric hero who is out to save the planet Bulge from the vile clutches of King Greedy. But it's not just the king who has grabby hands, Ristar gets about by grabbing hold of virtually anything and hauling it away. For instance, he can grab vines and branches to haul himself up and away. He can stretch out and snag handy items. He can even grab enemies, tug them close, and put them away with savage headbutts.

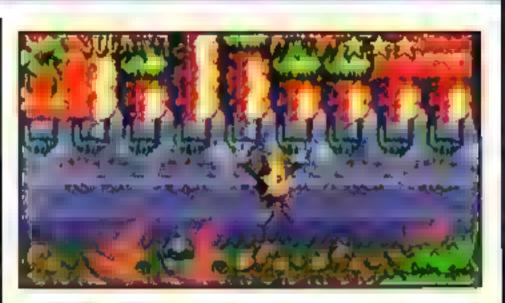

As there are no time limits, Ristar has time to explore the big stages to his heart's content. What's best, is that including bonus stages, there are 32 stages where Ristar can grab and

Konami, long known for their outstanding shooters and excellent action games, is rapidly becoming a major force in sports games. This cool soccer game joins their ace Powerful Pro Baseball in the Live Broadcast series with impressive play-by-play announcements. Movements of the players are extremely realistic, capturing all the fine nuances of the sport including even feints and slides. When a player is fouled, he even rolls around on the ground in obvious pain while the culprit complains to the ref.

The playing field is viewed from an easy-to-see diagonal angle. Players are relatively big, making for easy passing, shooting, and defending on the lifelike football pitch. Add the ability to change playing conditions and characteristics of players, and you have what looks like a major contender for the best soccer game ever. Perfect Eleven definitely scores.

Perfect Eleven looks like it's going to be one of the best soccer games around.

Choose from plenty of teams; perfect for the picky player who must have it all.

Unknown Price

Sorry people, it's not the sequel to Super Mario Kart, but it may as well be. Other than the fact that the racing machines are motorcycles, there's very little to tell the two games apart. For example, there are eight different drivers, but there are actually only four types with different characteristics for acceleration, speed, and handling. For One-player Mode, the bottom part of the screen can be used for displaying the course map or showing the rearview with two mirrors, just like a bike. There are many types of tracks including dirt, asphalt, cobblestone, and ice.

One thing that is radically different is the Chicken Race, where you hammer your bike down a ramp and stop as close to the edge as possible without going over the end in a smoking ruin. This really gets your adrenaline pumping! Just right for racing fans.

In the One-player Mode, you can see the map of the race on the bottom screen.

Or, if you wish, the bottom can be used as a simulated rearview mirror!

The sequel to the wildly hilamous, but hair-raising tough shooter is already headed over from the arcade scene. As the name suggests, this is a parody based on Konami's classic Gradius series of raunchy shooters. This time out Konami has expanded the selection of off-the-wall characters from four types to eight, including Big Viper and Lord British from Gradius; and Twinbee and Winbee from the Twinbee series. Other fighters include: pairs of penguins, sunfish, octopuses, winged pigs, stick figures on paper airplanes, and even a couple of bunny girls on missiles!

"Demented" is the only word to describe the enemies, as things are completely out of the ordinary. Despite all the hilarity, this cart upholds Konami's reputation for great shooters.

All new traps and dangers await you amidst the hilarity.

Brand new from Sega, an action-RPG in the mold of the most excellent Zelda series. The hero of this big 20-Meg quest is a young warrior who is equally adept at swordplay and archery. He is drawn with over 500 graphic patterns so his movements are extremely smooth and lifelike. He must fight many fantastic beasts in a magical, medieval setting where a dark cloud of evil has cast its soul-draining shadow. The hero must fight it out alone against almost hopeless odds with only the help of spellcasting spirits which he summons during battle.

Featuring a soundtrack by the master of game music, Yuzo Koshiro (whom we mistakenly credited for the not-so-great music of Streets of Rage 3, Sorry!), the RPG shows strong potential of becoming an engrossing, all-night sensation.

Summon spirits to toss the vicious enemies some nasty spells.

Travel from place to place, defeating the maniacal monsters that attack.

You'd better brush up on your sword fighting, or you'll be mashed.

Not even a year after the 1.5 millionselling DBZ2 hit the streets, the sequel is already on the way. The cast of fighters has been updated to keep pace with the long-running TV anime series so there are several new characters. For example, one of the newly added characters is Son Goten, Goku's son who was not yet born when Goku died warping the selfdestruction cell away from Earth. Another new face is Dabula, a demon helping the twisted mage Babidi set free an ancient god of destruction. Besides the new characters, some familiar fighters also return, including Son Gohan, now a high school student, and Goku back from the dead for one day only-halo included.

Bandai promises that the game system will also undergo some modifications to really turn up the heat of this already exciting fighting series. Count on seeing a blowout on this one soon!

The Split-screen Mode is still here, so you have more fighting options.

All the backgrounds are new, and the characters look better than ever.

Although numbered "2," this is actually the fifth in Yanoman's popular RPG series. (The "2" refers to the fact that this is the second game on the SFC—the first three were on Game Boy)

The story picks up where the first SFC Aretha left off. The heroine, Ariel, is the Queen of Aretha who is leading her people to rebuild her shattered nation. However, a letter arrives from her close friend, Doll, a young but powerful mage, begging for her help. She is torn between her duties as a leader and her loyalty to her friend. In the end, friendship prevails and she sets off to a mystical underground world in search of Doll, not knowing that she will become embroiled in a long and fantastic journey.

Yes, folks, another decent looking RPG that probably won't make it over here. Arrrgh! We need more RPGs!

ICEMAN HAS BEEN ICED!

For all of you sports fans who read the previous EGM insert, where Iceman introduced himself as the sports guru, there's been a change. Iceman mysteriously disappeared the day after he finished the insert. It's rumored that he was heading south, maybe to Mexico. No one knows why he left. It's a big loss to us, but more so for The Rookie. The only reason that I can think of as to why he left is that he's training in every event for the next summer Olympics If that's the case, we may see him in action. But for now, I've been called to take his place. My name's Jacques Itch, formerly of France. Now it's my duty to give you information on upcoming sports games, new sports technology in the game industry, and current sports game news with the help of The Rookie, of course. Plus, we will be reviewing the games, if they're finished. So, as a sports guru myself, we will try to give you the very best info on this topic. Check out the upcoming games in the following pages.

HEY, WHAT DO YOU KNOW? **MORE SPORTS GAMES!**

First of all, we will start by showing you the latest sports games that will be released in the future. Sega has produced another football game for the Genesis that may be recognizable from the later Joe Montana Football gamessome features are noticeably similarnow called College Football's National Championship. With the Zoom feature,

Let's move on, shall we? Rock N' Roll Racing has finally hit the Genesis, which

will be compatible to the Edge 16. It has cool tracks, especially on the higher fevels The game is still in the works, but it shows that Interplay can produced exciting sports games.

Another eyecatching racing game is Stunt Race FX (reviewed on the next page). This racing game uses the same FX chip which StarFox used. This chip will definitely increase the graphics performance in games to come.

"What about baseball games?" you ask. Tecmo will soon be releasing Tecmo Super Baseball, a baseball game that will stand out from the rest. Another baseball game is World Series Baseball for the Game Gear that will keep this portable going strong. Like the Genesis version, there will be a lot of options for you to pick from. Hook up with a friend and double the fun.

Tecmo Super Baseball uses many new features to stand out from the rest.

Atan fans, worry no further. Atari is releasing a racing game called Redline Racing, a virtual reality-like racer that very well may be the best racing game on the Jaguar. Another title for the Jag, from Telegames, is Brutal Sports Football (pictured below) This strange football game will soon be out. Look at later pages for previews of these Atari games.

Telegames' Brutal Sports Football is not your ordinary football game. You can use weapons like swords against your opponents.

HONK! HONK! GET THE *#@\$ OFF THE @\$*# ROAD!!!

Hey sports fans! Get ready to see the new FX chip at work. Stunt Race FX has great new features that take advantage of the FX chip

First of all, the rotation and scrolling of the graphics are too cool to be missed Fast-paced racing will keep your heart pumping around those sharp corners, and your stomach creeping up on upcoming hills. The sounds are decent, you can hear every shriek of your tires on those S-turns. Even hear the cars from behind pacing your distance. If you want a racing game with a comical twist, this one's for you You've got to see it to believe it!

Race against the CPU or you can invite your buddy over and play Versus Mode.

Pick from a variety of cars, each having different road performance.

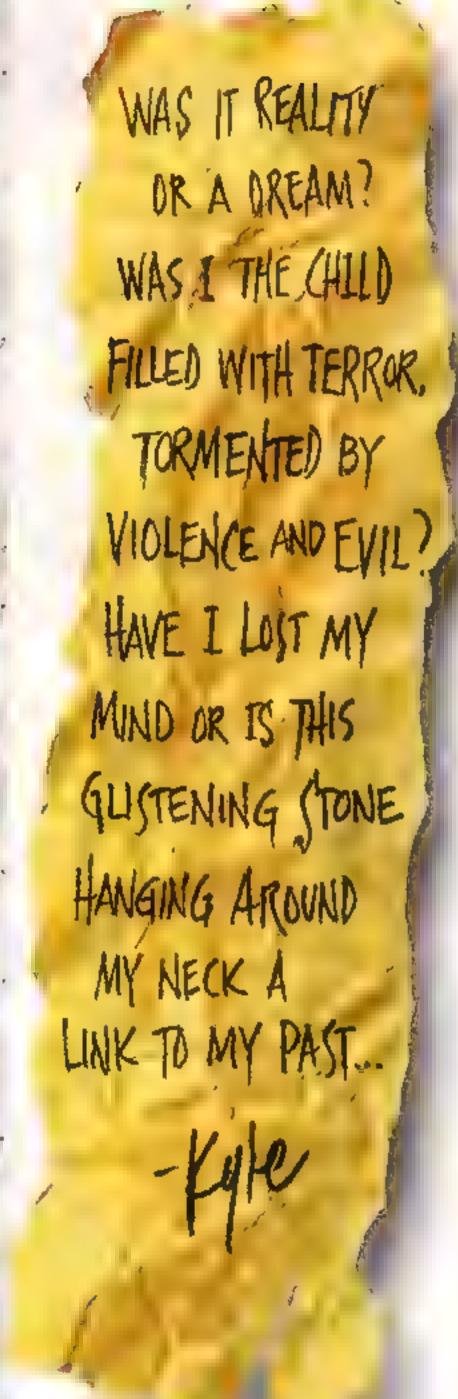

SUNDAY! SUNDAY! SUNDAY!

Many tracks to pick from, different road surfaces, and tough obstacles—it's all here!

Talk about some stunt racing, this game packs in a feature that enables you to race through stunt tracks. The tracks can be crazy, with many turns and hills for you to ride on. Collect as many stars as you can while avoiding the obstacles in your way. If you finish early and have collected a lot of stars, you may set a new track record. So hold onto your seat, it's going to be a bumpy ride

As far as I can see, Stunt Race FX is an average racing game, it shows that the FX chip is still young and needs some improvement. Scaling and rotation of the graphics are are amazingly good for the FX chip capability, but still a bit choppy at times. The

controls will take time to get used to, and car handling on turns is over exaggerated. Only average.

Oh boy! Another try for the FX chip. It's a good concept, but it didn't thrill me enough to give me a real feeling of racing. The graphics are still choppy and I had a hard time focusing on that small window. Nice try on the sounds. The controls are hard at first, but you'll eventually get used to it. As

for the feel, it's a good game, but it's not the full FX chip.

Watch where the guide will show up on the field, because that's where the ball will land.

Rookie and I have been waiting for this one to come in so we could have an indepth look at it. Especially while the baseball fever is on, we can't get enough. of baseball games.

Hey baseball fans, get a Super Baseb load of the special effects that Tecmo has developed for Tecmo Super Baseball. This game packages features that I have never seen in a sports game before. The rotation and scaling of the field is incredible. The other feature that is great about this game is that you can

AIKMAN'S OWN

Troy Aikman has won two consecutive football championships, and now he has his own game that will be a winner among sports gamers,

Together, Troy and Williams Entertainment have compiled a playbook consisting of the very best plays to bring you this totally awesome hard-hitting football game. All of the college teams are here with their current team's stats and rankings. Some features like the weather conditions and the play-by-play commentator have been added as well for your playing enjoyment!

The Zoom feature enables you to be closer to the action. Watch out for the tacklers!

COLLEGE FOOTBALLS HATCHAR CHAMPIONSHIP

The referees will always be there to make those close calls. Make sure you don't commit too many penalties on the field.

The game play mechanics are also the same as in the Joe series—very easy. Pick from a variety of plays from the playbook and initiate them on the field. The offense perspective may be tricky for starters, and you may have to get used to

the Zoom feature. You see small players at first, then you have to adjust to big players when the action zooms in. You will also have to learn how to use the passing cursor. You may either pick the Auto Mode, allowing you to pass the ball directly to your receiver, or choose the passing cursor which enables you to pass the ball wherever you want. It will take time, but it is effective.

There's nothing bad to say about this one. Just play your best and hope that your team can handle the opponent's offense.

Change your tires, wing, and steering type. Also in the Options Screen, you'll be able to view the weather, which allows you to make any changes on your car to compensate for the current weather, which will undoubtedly affect the road conditions.

One more factor is how the track is laid out. Some tracks may have very sharp sudden turns. For these, you may have to change your tires so that you can grip

Even though Atarl hasn't brought out that many games, the quality of these games is improving. The system is still young and it will develop to produce far greater games with highly detailed graphics. Hopefully we'll be seeing more games like this. We realize that Atari has a definite future in the game industry. Atari has shown its colors. Good job!

BLOOD ... NO FOUL

Pick up items on the ground, like a sword, and inflict damage on your opponent.

This isn't your ordinary football game at the park. If you're looking for a clean and regulated football game just keep walking until you find one. Brutal Sports Football takes place in another world where vikings, rams, and wizards make up a football team. Anything can happen here and the scoring of points is quite different from what you're used to.

First of all, the main secret to winning a game is to score in your opponent's goal by either running in the goal or kicking it But wait, it's not that easy. The defending

side has some tricks up their sleeves.

Anything goes. Blood? No foul! You can trip, tackle, stomp, and even slash your opponent with a sword, which you can pick up from the field. That's not all you can pick up, so always look at the field.

Make sure you keep your eyes open so you don't miss valuable items on the field.

and take advantage of what's being offered. Let's get back to the sword action One way to stop the other team's offense from scoring is by using the sword you've found and giving them some of the worst papercuts they have ever had Of course, there will be blood everywhere. If you're playing on the offensive side, you can pick up a shield and block your opponent's sword attacks. Or, you may pass to another teammate

who is free, and run for an easy touchdown.

The fundamentals of this game may very well be mixed with soccer—a soccer game that allows you to use your hands and and sharp weapons. The game play is very easy, both on the offensive and defensive perspectives. It may not exactly be your ordinary football game, but it excites folks who are seeking something different in a game—very different. Also, with a game that doesn't have regulations to stop the game during play, the intense action doesn't stop until the very end! It makes for some interesting situations, to say the least!

It's not how you win or lose the football game, it's just how much your opponent cries after being beaten!

ONE, TWO, THREE-YOU'RE OUT!

The Genesis version was great. Now that Sega has made it for the Game Gear, I feel that I have to see it in action.

First of all, this is an excellent translation to the portable. Pick from all 28 teams from the National, American, and Central divisions. Because it is sponsored by MLBPA, you get to see the current baseball greats and their stats. It doesn't stop there, either. You can play in a preseason game or go all the way and participate in the full season bonanza.

There will be four stadiums you will be able to pick from, both indoor and outdoor. The stadiums are different, and each stadium varies in size. The bigger they are, the harder you'll have to hit in order to send one out of here. What else

can you ask from a baseball game with a portable's capability? Ok, there's more. The action is incredible, watch the batters hit one out of here. Following the home run hits, Sega has awarded you with some cool cinemas.

Looking for someone to play against? Why not find a friend who has the same game and plug two Game Gear units together. You'll be able to play against your buddy and see who's the best gamer on the block.

As long as Sega keeps making great games like this for the Game Gear, this

system will be around for a while and will keep con-. sumers coming back for more, If you're looking for a baseball game for your Game Gear, this is the one to get You can never turn down America's pastime.

The action is great, right down to the pitching. Game players will be amazed at how well Sega has made this game. Very realistic.

tand back Street Fighter! It's the battle of the furry forest creatures in this new cart for your Super NES-Brutal. Why is it called Brutal? Well, the

word brutal seems to best describe the idea of a bunch of animals duking it out with a blistering array of punches and kicks as well as special attacks (and all the other 'nifties' fighting game characters get). One thing is certain ... after you play this game for a while, witnessing the prowess of these animals, you'll never look at Rover or Fluffy the same way

I like the idea of the cute little fluffies tearing into each other with Street Fighter-type moves.

Another fighting game? Could we at least start inventing new special attacks?

The very same people that brought you The 7th Saga are now bringing you Brain Lord. The town scenes look almost identical. Watch for this magical game!

With an axe you can break the rocks in the cave and find items hidden this strange town.

This giant cockroach is the Boss of the tower. He will run around as you hit him throwing out little roaches. Follow him around and dodge his babies. Strike him when he reaches the corners and you will find him dead sooner than you think.

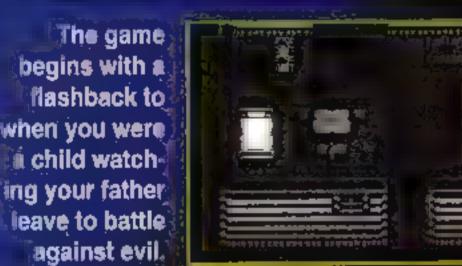

This Boss is like a huge magnet sucking you underneath him and taking your life. When he starts to suck you toward him you must turn around and keep jumping. That will keep you from getting too close to this huge piece of Junk metal.

This game has a lot of graphics that are similar to 7th Saga. The town and dungeon graphics look similar to 7th Saga's.

but the fighting style is definitely different. Both have unique objectives, and look very intriguing.

THE ECCO

There are a lot of puzzies you must solve to get through certain rooms, making this a unique RPG.

THE SAD

To be honest, this game is really good and I don't have anything bad to say about it.

THE HERV

The first Boss in the Tower of Light is a huge cockroach, and man, do I hate them roaches!

This robot has busted into your town and is creating havod. He's grabbed you but he will lose his grip. Once he drops you, run with all of your might. He'll start grabbing your friends and then you. Beat him up? and make him drop your friends.

ynamite Headdy is one heck of a game. There are so many different things you can do. First there are over 10 different power-ups in the form of your head. You use your head to defeat the enemies and reach new horizons You have heads ranging from a hammer head, to a blower that blows stars out of your nose, to a vacuum head that sucks in all the enemies on the screen! Most are very hilarious looking. There are a lot of amusing tidbits

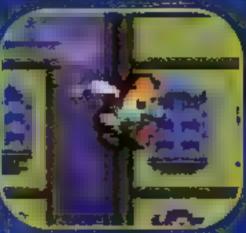

throughout the game to keep you chuckling. There seems to be a Boss around every comer giving you new enemies on every level. Some Bosses are extremely easy to beat while others are extremely hard and take a little brain work to figure out a pattern and then attack. This game is huge, so you won't find everything the first time through. There are plenty of hidden secret items to get more bonus

points at the end of the level. This is definitely a game to watch out for

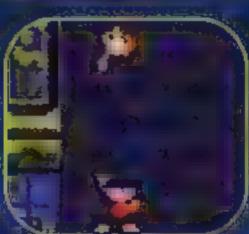

secret number

Mega Amounts of Power-ups!

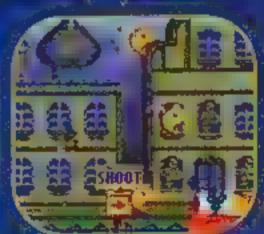

This head does: double the damage when you need to pack a punch.

Turn into a miniature version of yourself to get into those really small places.

Get some sleep and you can get back some of your precious life.

Get three shots: off for the low, low price of only press ing a button

Use this head to grab onto walls and ceilings to give yourself a boost

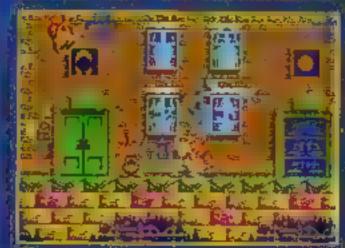

This chicken head shoots very humor ously but is pretty strong.

Turn into a bi-plane and you can turn around and fire at enemies behind you.

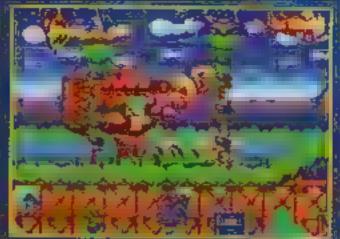

This laser is a great weapon when you need to shoot directly ahead of you

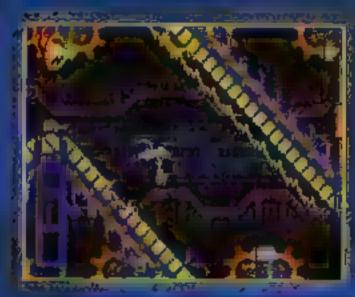

Go through these doors and beat the skill testers.

This dragon type Mid-Boss is very simple to beat.

Hit this guy lots of times to release your friends.

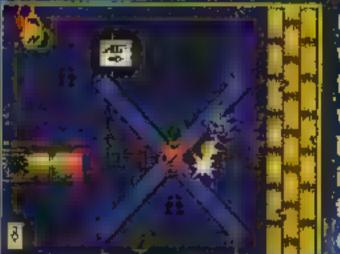

This part has 🛊 shooter 🖠 mixed in with all the other exciting action, make ing a cool level.

This marionette Boss is pretty tough, He keeps changing clothes, each one giving him different powers. Watch the little target guy and he'll tell you what part of the puppet you need to hit next.

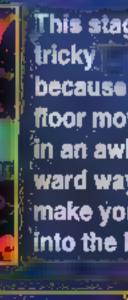

Get on this wheel and then shoot it with your head to make it revolve in the right direction

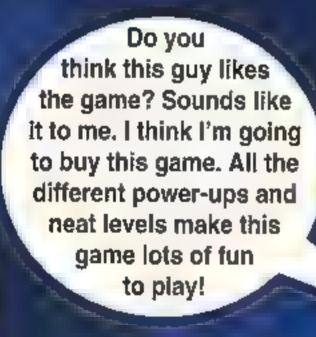

This Boss spins the floor around, placing you on the other side of the arena. This makes it very hard to play but extremely cool looking. Hit him in the face when his arms are stuck in the ground.

This girl comes out and takes the key after you beat the level Bosses. See if you can find out why she takes 批

This end Boss is tough unless you grab the Time Stall Head and freeze him. Once he is frozen in time, gak him to death.

The baby face Boss is easy if you keep your distance. Destroy all three forms of this Boss and you can move on?

THE GOOD

This game has excellent graphics, a good soundtrack, and really cool voices. I even like the control.

THE BAD

The bad thing is I don't like having to wait for an excellent game like this to be released in stores.

THE DOLY

Watching poor Headdy run around 1 in terror when something scares the heebie-jeebies out of him.

ESCOPE FROM MARS

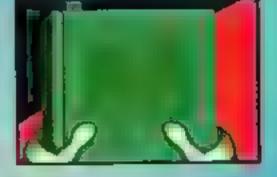

arvin the Martian is bored. He needs a new addition to his intergalactic Zoo. Any guesses who the new addition is? That's right, that furry little fuzzball is back, and he no longer fights for Tazmania. Now he's trying to find his way home. Taz has a few new weapons to eat and the animations are superb. This game is not for the weak-willed, however, It's one harsh trip back to Earth, and you're along for the ride!

As we join Marvin the Martian, he seems to be engrossed in a book of some kind.

What would he be looking for in a book about rare Earth creatures?

A new pet?

Well, it seems he's

found whatever he

wonder what it was

was looking for. I

he found.

Oh no ... not him ...
anything but him!!!
He eats trees for
goodness sake!!!
That's just wrong!

The first level puts you smack dab in the middle of the intergalactic Zoo. Watch out, there are other animals to worry about besides tank men, large red goliaths, and other members of Marvin's lackeys.

A valuable asset is the Taz statue. These are checkpoints where you will continue from.

You will find these glass casings from time to time. They will teleport you to different places.

He's done it now! Taz has dragon breath, which is a good short-range weapon.

Rocks have to be hard on a nervous system! A good long-range weapon.

First Aid Kit

The first aid kit will give you the most energy back. This is very helpful.

Hamburger

The hamburger will give you a small amount of energy back.

Extra Man

The Taz portrait will give you an extra man to work with.
What a bonus!

Fruit

The fruit will almost always give you a good bit of energy back.

Ham

The ham has less energy than the fruit, but more than the hamburger.

This is useless. It makes you unable to attack or pick things up.

As was said before, one of your best assets is the spin. Another good use is "wall bouncing."

Press the spin button and the jump button at the same time and move to the left or right.

This will bounce you to the top of a smashed group of walls. From there you can move forward.

THE GOOD

Great animations! This looks like it came straight from the Looney Tunes vault, Marvin kicks butt!

THE BAD

I have never gotten this frustrated have mever gotten this frustrated have been the Level Two Boss is in a realm beyond impossible.

THE UGLY

Let's just say I hope this second Boss was a glitch. OK? 'Nuff Said!

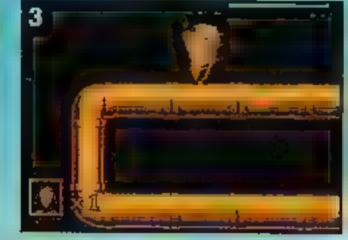

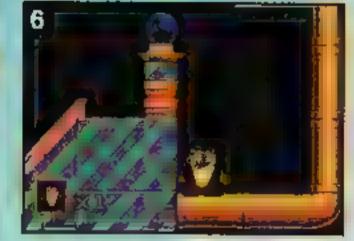

Another use for the spin besides breaking walls and killing enemies is clinging on to pipes.

Just hold down the spin button and move either left or right; the choice is usually yours.

Watch how fast you go.

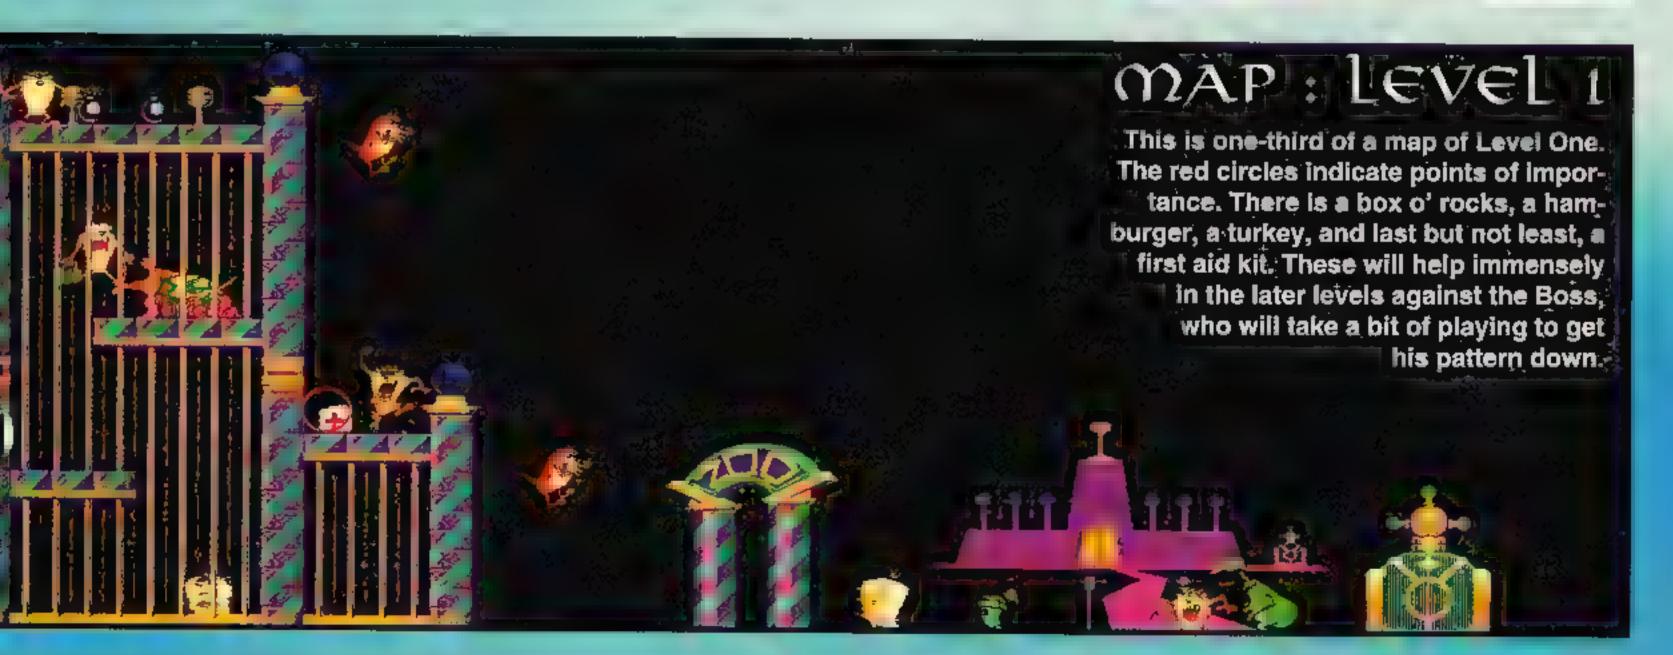

Sometimes you'll blur right into an enemy or a cracked pipe without even knowing.

Toilet Fun

THE GOOD

A game about bodily functions? That's a pretty cool idea, as opposed to gory violence.

THE BAD

I sure hope the control is improved before the finished version hits the stores.

THE UGLY

The expressions of joy as Boogerman releases some really wretched fumes.

Soul Star is in very many respects like StarFox, and is a better game for it. It offers more of a challenge for shooter fans and the levels are really a sight to behold. The sheer challenge of the game is compounded by the swarms of ene⊰ mies that constantly attack and the everchanging backgrounds that are interactive. Soul Star is a definite must-see game you won't want to miss.

THE GOOD

Wow! The graphic engine for this game is excellent with a capital E. Play is exciting—a great shooter.

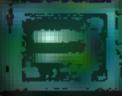

THE BAD

THE GOOD

Top Hunter has some awesome attacks, which have been taken from SNK games. Cool!

THE BAD

I wish the levels could have been longer, because this game was too easy for my blood.

THE UGLY

Why do the minions of the Bosses have big heads? It's probably some disease.

Use your basic moves to get rid of the small enemies walking around.

Here's a fast way to get rid of your enemies: knock em off their feet.

El lenge CREDI

To find power icons, look out for the flashing enemies. They hold the power icons. Hit them to unveil the icon. Pick it up

and really feel the power of your moves.

Try using your hidden moves as well.

Cathy's moves are fast, especially if you know how to use them correctly.

The slide move is like Roddy's quite effective

HIDDEN MOVES

Roddy can be extremely deadly if you're able to find his hidden moves. Fighting off the Bosses is a breeze try using fireballs from a distance.

DUAL PLAYING GROUND

Double the fun by jumping from the foreground to the background.

HIDDEN MOVES

Some of Cathy's hidden moves are from previous SNK games. They're victous in damaging enemies, Find them to destroy the final Bosses.

PICK UP USEFUL ITEMS ON THE WAY

Jump in the Robo Beagle and chase down your enemies. Grab and throw them to their deaths

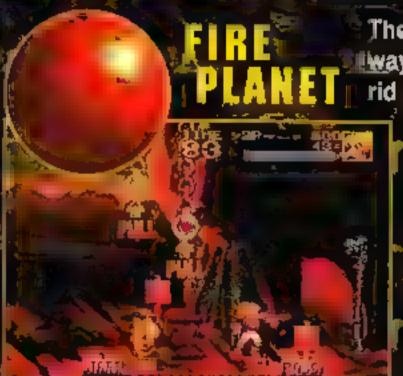

Pick-up these icons. Some allow you to have more time on the board, and some replenish your Life Meter.

They now have a new president that is: willing to use any means to regain the number one spot. They devise a plan using the very latest technology to shrink down assassins so they can enter the human body. Now you must go in and try to stop the destruction of the president.

LEVEL 2

Now you are using a Hunter-Killer to clear the bad guys from the lungs.

After you defeat the Level One boss, you will enter this pod to change ships.

THE GOOD

The story line and the cinemas are really cool and the graphics are excellent too.

THE BAD

I don't like the fact that you can't control your flight path, all you really do is shoot.

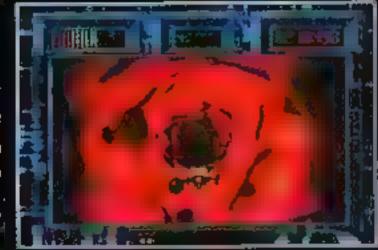

THE UGLY

The bad guys in the game will hit a you as they come onto the screen before you can even see them.

Watch out for the enemies who come from behind—they are really fast.

You can find power-ups in the levels to get better weapons.

A LOOK AT STREET FORMATS...

leven years ago: video game manuleven years ago video game manu facturers were experimenting with the possibilities of laser disk games One of the first to be released, and certainly the most remarkable of those laser disk games was Dragon's Lair Dragon's Lair is an epic story of a bumbling knight on a quest to rescue his fair princess from the clutches of a fire-breathing dragon appropriately named Singe Your

goal is to survive a long and tedious jour ney through a castle which is loaded with numerous pitfalls and traps. Dragon's Lair plays more like a movie than it does a video game, and the animation is equal if not better to a Saturday morning cartoon It may take you a little while to get used to the way the game controls, but be warned sonce you do, the game becomes very addictive! Good luck.

A RESS

Singe has captured the voluptuous Princess Daphne and it's up to you to save the day!

When you first encounter Singe listen to the princess for tips on how to defeat him.

He will try many times to stop you from making it out of the castle alive! Go Dirk!

if you plan on defeating the mighty dragon, you'll need to grab the magic sword.

When Singe is defenseless, grabi the sword and thrust it deep into his chest!

This is the best adaptation of an arcade game ever! Graphics and animation are superb. Excellent!

THE RAD

Now that I've got Dragon's Lair fever, I can't wait until they bring out Dragon's Lair 2: Time Warp.

THE HELY

The 3DO and Sega CD versions don't compare to this one. This one will definitely be worth the wait!

This is the third time Dragon's Lair has been released for a home CDbased system. It is also the best version so far! The Sega CD version suffers from lack of control and grainy graphics. The 3DO version has good control, but the graphics and the sound just can't match up to the incredible Job that was done on the CD-i. Thumbs up!

ega Man is as cool as ever in his newest installment for the GB series. This being the fifth installment you might think it is getting a little repetitive, but that's where you would be wrong. Mega Man V has a whole new cast of robots to put your blaster to the test. In fact, they are so strong that Dr. Light has to build you another blaster just so you can do damage to them. This sequel even has money, or PC points, which allow you to buy new power-ups from Dr. Light. If you have a Super Game Boy, the game switches color every stage, giving an effect of almost 8-Bit quality.

This Boss returns from the very first Mega Man. He'll shoot at you and then his body parts will fly at you. Dodge them and hit his eye to waste him for good!

THE 6000

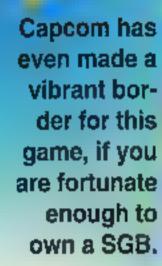

The graphics are like 8-Bit and if you have an SGB, look forward to a visual treat.

THE BAD

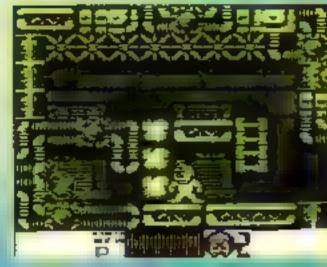

The game moves a bit slower than normal Mega Mans, but that is understandable on a GB.

THE UGLY

My nails after biting them to the bone from the action and thinking involved in this game.

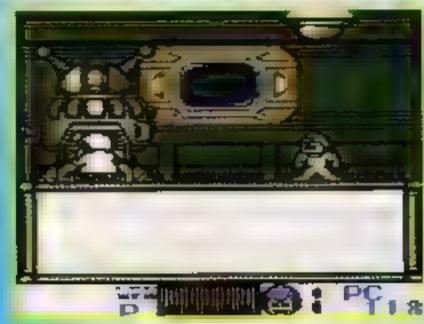

If you find all four of these jewels, Dr.
Light will build you an item to reduce your power usage.

In this level,
there are

You'll either

or lower.

This is Dr. Light's lab where you can buy new power-ups using the PC points that you pick up.

ove over Sonic! Dynamite Headdy from Treasure Software is about to make you re-think how you feel about action games on your Game Gearl This game is totally unique in the way it looks and plays. What makes it so differ ent from other action games is that the levels are not set up with any pattern to them. Some levels have Mid-Bosses as well as the final Boss while others just have one. Along your way you'll find special power-up "heads" that give you temporary powers such as the vacuum pig hammer and sleeping heads Prepare to butt heads!

This game really holds up to its big brother's masterpiece standard.

THE BAD

The what? This game is a blast, it could have been longer, though.

THE OGLY

Most of the Bosses in this game. Truly bizarre!

in Level Two, hit the icon above your head in this spot. It'll release 🛊 ball that will 🖁 squash anything in its path

The first level in this game is pure speed. Use your noggin to smash your way through the poles that are in your path. Beware of the enemy sirplanes that try to take you out from above. Just be sure to jump in time when they drop their bombs on you, and you'll live to fight another day

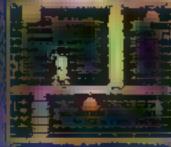

in Level Two, bash your way through enemy territory as you collect hammer and pig nose power-ups. Enter the concert half and face the end level Boss!

The action gets really intense in this level. Take on the snake and the floating knight helmet. Fight for your life as a giant arm grabs you and takes you for a ride

Nintendo gave a special demonstration at the CES of two of their new Ultra 64 (formerly Project Reality) games. The first one, being developed by Rare, is a very detailed-rendered [street fighting-type game.

Called Killer Instinct, this game features 10 characters each having specific traits and abilities. They are: Meltdown, a molten lava man; Chief, Thunder, an Indian with tomahawks: Jago, a martial arts man whose weapon is a fireball; War Wolf, a half man half wolf; Fulgore, a robot; Spinal, a skeleton; TJ Combo, a boxer; and three more yet unnamed characters: a woman, an iceman, and a dog-type creature.

Each of the characters will have his/her own background and there will be a 'special effect' that can be implemented for each background. For example, Chief Thunder's screen is a rope bridge over the Grand Canyon, The player can zoom in and out for a different perspective. TJ Combo's screen will be a gym, and if the correct special move is executed by the player, you will be able to knock your opponent through the wall and into the street. Other backgrounds will include a 360 degree circular fountain area, a

Each character in Killer Instinct will be rendered in great detail! Jago is pictured.

pirate's room (Spinal) and city back streets (Jago?)

While far from complete, Killer Instinct will not live up to its name as there is very little blood and there will be no Mortal Kombat gore. Rather, the game will be a strategy/technique-type: game, on the order of SF2, Combos will be the main goal to accomplish: and the project manager promised

that the maximum attack, for the largest number of points, would be a 13-hit combo!

Nintendo expects this game to be available when the system is launched in the fall of 1995. An earlier arcade debut is possible but Nintendo wouldn't confirm a date. More next month!

Chief Thunder's main weapons will be his powerful Tomahawks...

Hills

in addition to Killer Instinct, Nintendo previewed Williams' new driving game for the Ultra 64 called Cruis'n' U.S.A. This game was much more complete as the sit-down version was fully operational (\$1 per race) and almost the entire course was programmed in. This game will probably be in the arcades early this fall and then everybody will be able to see what Nintendo's Ultra 64 is capable of.!

Unlike Kl, Cruis'n' was not as revolutionary a game. Looking more like a very detailed Outrun rather than the hot, new Daytona or ultrafast Ridge Racer, Cruis'n' takes place over the two-lane highways

of America starting in San Francisco and ending 14 segments later in Washington D.C.

An artist's drawing of the game screen in Williams' new Ultra 64 (Project Reality) arcade game, Cruis'n' U.S.A.

Like any racing game, you have your choice of four cars when you start: the red Italia P 69 (Ferrari lookalike), the silver Devastator D1 a brown La Bomba (old '40s car), or a 1963 custom yellow Corvette. Of course, you can select either a fourspeed stick shift or an automatic. tranny. The goal is to complete each of the segments in the allotted time. Do that, and you progress to the next segment.

Is this a representation of the capabilities of the Ultra 64? Perhaps. While looking good, it is more typical of first generation-type games. That is, they are OK, but not spectacular. Only after the

programmers begin to understand the hardware, will we get to see some of the really great games. More on this next issue:

It's time you finally did something about those monsters under your bed.

3 D O

You're not a helpless kid anymore. You've grown up and you've got *Slayer*, the first Advanced Dungeons & Dragons game on 3DO.

Now you're an AD&D game hero armed with weapons and magic, exploring dungeons filled with the deadly monsters of your nightmares.

Hack and slash away at these vile creatures, avoid treacherous traps and solve mind-bending puzzles.

The randomized dungeon generator can create over 4 billion different dungeons.

Which means a new monster hunt every time you play!

Because it's designed for play on 3DO, Slayer gives you the most awesome graphics and animation you've ever seen. Plus a first-person perspective that lets you look up, down and all around.

It's virtually real!

Slayer. It's time you made those monsters look under their beds!

Jurassic Logo for NBA Expansion Team

ferocious new animal was recently released into the world of the NBA as the Toronto Raptors, the league's newest expansion franchise, unveiled its hip new logo.

As the story goes, the logo-featured dinosaur is a highly evolved species of "Globoraptor" (Latin for ball thief or ball robber.) Evolved from species like the velociraptor and oviraptor, the Globoraptor is known for its breakout speed, its coordinated attack patterns, and ferocious team defense. With cunning intelligence and killer instincts, the Globoraptor has been known to grow as large as seven feet tall."

Toronto's prehistoric moniker "Raptors" was chosen from over an estimated 100,000 entries submitted by 60,000 Canadians from nine of the 10 Canadian provinces. (Vancouver, home to the as of yet unnamed other NBA expansion franchise

awarded to Canada, was, for obvious reasons, not allowed to participate.) The end

end result his

more than 2,000 different names from which to choose.

Entries ranged from meteorological phenomena like Blizzard, Thunder, Chill, and Freeze, to more game-related tags such as Sky, Swish, Jam, and Slam. Other dinosaur-related offerings included Rex, T-Rex, and Saurus Rex, as in TorontoSaurus Rex.

Toronto's "Name Game," sponsored in part by Sega and AST Computer, was the largest contest of its

history, casting a monstrous shadow over the previous record of 28,000

> set by the Phoenix Suns way back in 1968.

While the Raptors don't hit the hard-

wood for over another

year, Raptor merchandise is already hitting the sporting goods stores. With the introduction of a very cool logo and the still warm afterglow of last summer's blockbuster Jurassic Park look for Raptorwear to be some of the hottest selling stuff in sports apparel.

The Raptors begin their season in November of 1995. Said team president John Bitove, Jr., "We'll be the hungriest team in the NBA."

They'd better be, for when the first ball is tipped in 1995, the other 28 NBA teams will all be fighting to throw Canada's Toronto Raptors back into extinction.

Sega and Blockbuster Team to Bring You Games on Demand

Blockbuster this week, and still no Mortal Kombat II.

How many times has this happened to you? You end up either renting a game you didn't want, or you walk away empty-handed to spend another night with Sonic the Hedgehog.

Finally, it seems your troubles may be over. Sega of America and Blockbuster Video have announced plans to join forces to put an end to this retail rental nightmare.

The two companies are presently test marketing at select Blockbusters a system that permits video game software to be stored

electronically at retail stores, and down-loaded on demand onto specially designed reprogrammable video game cartridges. The games would look and play exactly like the standard video game cartridge, but without the wait.

With the hottest new carts costing in the neighborhood of \$65, the smartest shoppers are choosing trial by rental before dropping their dough up-front to discover that a game stinks. This system will get those people the games they want.

If all goes well with the test market, this type of system could be available to all rental retailers as early as next year.

The Road to Nirvana

Vanceuver-based Grunge Enterprises is hoping to make a quick buck on the recent death of Kurt Cobain and the media homogenization of Generation X. For a mere \$20, fans can buy a memorial T-shirt featuring Cobain's hand-scrawled suicide note. Corporate exploitation still sucks!

Dog Day Afternoon for the Weiner

Hot dogs were given a bad rap recently
when a study by California researchers
linked hot dog consumption to leukemia.

Of 464 kids studied, those who are 12 or
more hot dogs a month were more likely to
develop leukemia than those who did not.

Comics Turn Hot Property in Hollywood

comics have always had their niche in Hollywood.
But until now, that niche has been pretty small.
Only the big boys of comics were allowed to play.

The Man of Steel, Christopher Reeve, has on four occasions pulled on the red and blue spandex to make the world safe for democracy. The Dark Night returns to the big screen again next summer as the Caped Crusader (Michael Keaton) fights to save Gotham City from the wiles of the Riddler. Even Hollywood pretty boy Warren Beatty made a comic bid, donning the famed yellow slicker of comic's best known dick, the blunt-nosed Dick Tracy.

But the list ends right about there. Hollywood has taken stock in the Super Men of mainstream, knowing that familiarity breeds not contempt, but instead box office dollars. That philosophy is changing.

With the unforeseen success of The Crow, and the excitement surrounding the The Shadow and the release of The Mask, Hollywood moguls have perked up their ears.

The Crow, based on the comic book by James O'Barr and starring the late. Brandon Lee, is one of the summer's best box office surprises, having already grossed over \$50 million in ticket sales.

Radio program turned comic book turned movie, The Shadow, starring Alec Baldwin, has been one of the most anticipated releases of the summer movie season.

The Mask, starring the rubber-faced funnyman Jim Carrey, is based loosely on a comic by the same name. With the rising star power of Jim Carrey and neverbefore-seen special effects

from Industrial Light and Magic (the people who brought to life Jurassic Park), The Mask could prove one of the summer's biggest movies before all is said and done.

With an unending wealth of titles and characters, comics has a lot to offer. Hollywood is just now stumbling onto this realization.

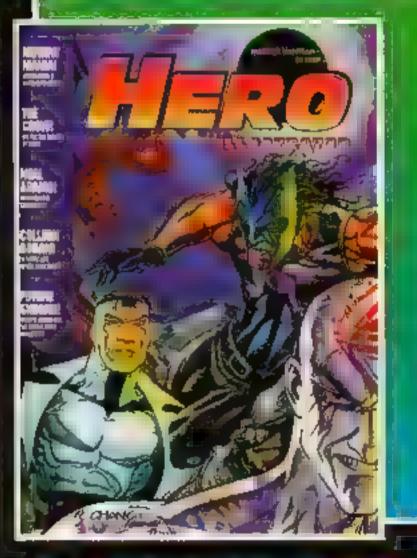

Movie studios right now are aggressively seeking alliances in comics, and not just with the DCs and Marvels of the comics world, but also with some

of the smaller publishers like Kitchen Sink Press, publisher of *The Crow*, and Dark Horse Comics, home to *The Mask*. Hollywood has discovered that the little guys have a lot to offer.

Comic titles presently in the works for film include Spider-Man, directed by Terminator 2's James Cameron, Stallone as Judge Dredd, and Tank Girl, the adventures of a cyber-punk heroine.

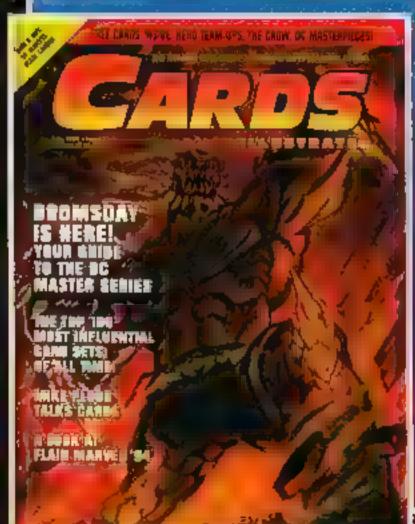

So Batman and Superman beware; your comic book brethren have landed in Hollywood.

THE VIDEO GAME

FROM SUNSOFT

COMING IN AUGUST

@ 1994 Sun Corporation of America. All Rights Reserved. TM & @ 1994 DC Comics.

"Hey, Billy, since you're gonna be away, can I borrow your Fighter Stick for a few days? I promise—I'll take *real* good care

of it..." That's how it starts. Then
days turn into weeks, and the
next thing you

know, you and
your former best friend are duking
it out on the People's Court. One
look at the Fighter Stick, and you'll
know why. There's enough power

here to change a person, to make 'em

untrustworthy, even. There's Turbo-Fire and Auto-Turbo, with up to 36 shots per second. And super slow-mo lets you

Then digest those really tough moves, not the So, quit wrestling with those boring, wimpy control pads

— reach for the Fighter Stick SN for the Super-NES or the Fighter Stick SG-6, for Sega-Genesis and Sega-CD.
